QNA is proud to announce the inaugural Tax Innovation Summit UAE 2025, set to take place on 10th December 2025 at the Dusit Thani, Dubai. This landmark event will convene more than 200 senior leaders, policymakers, tax authorities, technology innovators and finance executives, bringing them together to explore the UAE's next era of tax transformation and digital regulatory advancement.

The UAE is preparing for one of its most significant tax transformations with the phased rollout of mandatory e-invoicing, beginning with a voluntary pilot in July 2026 and progressing to full adoption for B2B and B2G transactions based on business turnover. Under the new framework, companies will be required to shift to standardised electronic formats, such as PEPPOL, and work with Accredited Service Providers (ASPs) to ensure real-time validation, structured reporting, and regulatory compliance. This transition is central to the UAE's wider vision to digitalise its economy, strengthen transparency, enhance operational efficiency, and reduce VAT-related risks.

Against this backdrop, the Tax Innovation Summit is especially relevant, offering businesses critical insight, guidance and technology solutions to prepare the changes ahead and navigate the country's evolving tax landscape with confidence.

The summit features a distinguished speaker lineup including:
