

Giga-Mint Founder David 'Dave' Borsh Featured on Crypto Hipster Podcast: 'Making NFTs Simple for Everyone'

Giga-Mint founder Dave Borsh joins the Crypto Hipster Podcast to discuss simplifying NFTs for families, first-time users, and everyday collectors.

CANTON, MI, UNITED STATES, November 19, 2025 /EINPresswire.com/ -- Dave Borsh explains how [Giga-Mint](#) removes the technical barriers of NFTs, making [digital keepsakes](#) easy for families and first-time creators.

“

Giga-Mint was built for one purpose: helping people preserve their memories without worrying about blockchain complexity.”

Dave Borsh, Founder of Giga-Mint

Earlier this week, Giga-Mint founder Dave Borsh joined Jamil Hasan on the [Crypto Hipster Podcast](#) to talk about his mission to simplify NFT creation for everyday people. The episode, titled “Making NFTs Simple for Everyone,” dives into how Giga-Mint transforms complicated blockchain processes into a guided, user-friendly experience built for

families, beginners, and personal collectors.

Borsh shares the story that started it all: trying to mint his first NFT and running into the same problems average users face—confusing wallets, technical errors, security concerns, and crypto complexity. That frustration became the foundation for Giga-Mint’s core philosophy.

“Most people want to mint a memory, not learn blockchain,” Borsh said during the interview. “Giga-Mint is built so parents, families, and everyday collectors can create digital keepsakes without needing crypto expertise.”

A Real-World Test: Jamil Hasan Mints His First NFT

During the conversation, Hasan revealed that he personally used Giga-Mint for the first time the day before the interview. He minted a photo of him and his 12-year-old son during a trip to New York to see WWE Raw.

“It worked really well — seamlessly,” Hasan wrote in a post announcing the episode. “Giga-Mint focuses on Solana, recommends a wallet, and lets you pay in dollars. It’s perfect for families and

newcomers.”

Personal Use Over Speculation

The episode highlights a key difference between Giga-Mint and traditional NFT platforms. Rather than building a speculative marketplace, Giga-Mint focuses on personal photo keepsakes, family memories and milestones, legacy and storytelling, and digital collectibles that are not meant for trading.

“For most people, the value of an NFT isn’t resale. It’s remembering a moment forever,” Borsh said.

Beyond Keepsakes: Fundraising, Team Spirit, and Loyalty

Giga-Mint is also gaining traction in other areas. During the podcast, Borsh discusses how simplified NFTs can be used for sports team fundraising, community badges, loyalty rewards and achievements, and special edition collectibles.

All of these applications work without requiring users to handle crypto exchanges or maintain complex wallets.
