What Is The Forecast For The Propanol Market From 2024 To 2029?

In recent times, the [propanol market has experienced consistent growth](#). The market size is predicted to increase from \$3.83 billion in 2024 to \$3.96 billion in 2025, showing a compound annual growth rate (CAGR) of 3.6%. Several factors have contributed to this upward trend in the historical period, including the demand for industrial solvents, expansion in the paints and coatings sector, pharmaceutical production, consumer product formulations, surface coating for electronics, and the printing and packaging industry.

Expectations of solid growth are projected for the propanol market over the next several years, potentially reaching

\$4.9 billion by 2029 with a Compound Annual Growth Rate (CAGR) of 5.5%. Several factors can be linked to the predicted increase throughout the forecast period, which include pharmaceutical API manufacturing, eco-friendly formulas, emerging biotechnology applications, emphasis on green chemistry, a surge in personal care product usage, and a transition to waterborne coatings. The forecast period also anticipates primary trends such as technological progress in manufacturing procedures, booming demand for disinfectants and sanitizers, a shift towards bio-based propanol, capacity expansions by leading manufacturers, as well as strategic collaborations and partnerships.

What Are The Core Growth Drivers Shaping The Future Of The Propanol Market?

The propanol market is predicted to see growth catalyzed by the escalating needs for pharmaceutical products. The increasing demand for pharmaceuticals could be attributed to factors such as the global population's aging, the rise in chronic diseases and improved access to healthcare in developing regions. As a key solvent in the manufacture of various pharmaceuticals, Propanol plays a crucial role in dissolving active ingredients and maintaining the right consistency in liquid formulations. For instance, the Government of Canada reported that in August 2024, the domestic exports in the pharmaceutical trade had risen to 12.79 in 2022, up from 10.71 in 2021. Simultaneously, imports surged from 26.63 in 2021 to 30.21. This data points to a burgeoning pharmaceutical trade sector, with growth seen in both exports and imports. Consequently, the escalating needs for pharmaceuticals are spurring the growth of the propanol market.

Which Companies Are Currently Leading In The Propanol Market?

Major players in the Propanol include:

- The Dow Chemical Company
- BASF SE
- Deepak Fertilizers and Petroleum Corporation Limited
- DuPont de Nemours Inc.
- Eastman Chemical Company
- ExxonMobil Chemical Company
- Honeywell International Inc.
- LyondellBasell Industries NV
- Mitsui Chemicals Inc.
- Nanjing Wujiang Chemical Company Limited

What Are The Top Trends In The Propanol Industry?

Leading firms in the propanol market are prioritizing strategic alliances and collaborations to maintain their market dominance. Such partnerships stimulate innovation, boost production capacities, and make way for entrance into new markets, thereby propelling overall market growth. Take for example, the March 2022 announcement of a new strategic alliance between SHV Energy, an off-grid energy distributor from the Netherlands, and LanzaTech, a chemical manufacturing business from the US. Their aim is to supply renewable propane and other eco-friendly fuels through various proven and new distribution networks. The collaboration will concentrate on advancing LanzaTech's existing synthetic biology platform and CCT technology, which transforms waste carbon into sustainable fuels and other commodities such as fabrics, packaging, and different products.

Comparative Analysis Of Leading [Propanol Market Segments](#)

The propanol market covered in this report is segmented –

- 1) By Type: Iso-Propanol, N-propanol
- 2) By Grade: Technical Grade, Pharmaceutical Grade, Cosmetic Grade, Electronic Grade
- 3) By End User: Pharmaceuticals, Chemicals, Personal Care, Printing Inks, Paints And Coatings, Other End Users

Subsegments:

- 1) By Iso-Propanol (Isopropyl Alcohol): Industrial Grade, Pharmaceutical Grade, Cosmetic Grade
- 2) By N-Propanol (N-Propyl Alcohol): Industrial Grade, Pharmaceutical Grade
