

INNOCN Announces Seasonal Adjustments to Product Availability and Pricing for Mini LED and QD-OLED Monitor Lineup

LA, CA, UNITED STATES, November 21, 2025 /EINPresswire.com/ -- INNOCN today announced an update to its product availability and seasonal pricing strategy for several Mini LED and QD-OLED monitors during the end-of-year shopping period. The announcement reflects the company's annual participation in industry-wide retail events that occur globally in November.

According to INNOCN, the company will temporarily adjust the market pricing of selected 27-inch and 40-inch models to align with broader retail activity occurring across the consumer electronics sector. These adjustments are part of INNOCN's yearly schedule for inventory rotation, channel cooperation, and regional availability planning.

Product Lines Included in the Seasonal Update

The following display series are included in the company's seasonal availability notice:

[GA27M1Q](#) — 27-inch QD-OLED model featuring a 1440p panel and 500Hz refresh rate.

[40C1U](#) — 40-inch 5K ultrawide model designed for productivity and professional workflows.

[GA27W1Q](#) — 27-inch QD-OLED monitor with a 500Hz refresh rate.

GA27T1M — 27-inch Mini LED model with 1440p resolution and 320Hz refresh rate.

25M2S — 24.5-inch Mini LED display supporting 240Hz and HDR1000 certification.

These models remain available through INNOCN's authorized online retail channels, including

Amazon in select regions.

Context for the Announcement

INNOCN noted that the update is part of broader industry trends in which display manufacturers adjust product positioning, inventory strategy, and pricing near the end of the fiscal year. Many consumer technology brands participate in similar seasonal cycles to accommodate demand patterns, stock fluctuations, and new product pipeline timelines.

The company stated that the temporary adjustments will remain in effect from November 20 to December 1, after which standard pricing and availability will resume based on regional inventory levels and channel requirements.

About INNOCN

INNOCN develops Mini LED, QD-OLED, and productivity-oriented display solutions for gaming, creative work, and professional environments. The company focuses on panel innovation, industrial design, and multi-scenario display applications.
