in size. The growth of these bacteria is hindered by antibiotics, making them extremely valuable in preventing and treating bacterial diseases. For instance, as of February 2023, the World Health Organization, an American-based specialized health agency located in Switzerland, reported that in 2022, 30 countries globally were grappling with a cholera outbreak. The cholera case fatality ratio (CFR) stood at 1.9% in 2021, marking the peak in a decade. Consequently, the surge in bacterial infections is fuelling the antibiotics market.

What Are The Main Trends, Positively Impacting The Growth Of Antibiotics Market?

A significant shift in the antibiotics market is attributable to the approval of new products, with major firms obtaining regulatory permissions for innovative antibiotic formulations. For instance, Alkem Laboratories Ltd., a pharmaceutical firm based in India, launched Zidavi in January 2023. The medication, a blend of ceftazidime and avibactam, is used to treat complicated illnesses like urinary tract infections, intra-abdominal infections, and pneumonia resulted from multi-drug resistant (MDR) Gram-negative bacteria. Zidavi, being one of the scarce antibiotics effective against MDR Gram-negative bacteria, represents a crucial step forward in the battle against antibiotic resistance.
