### What Are Key Factors Driving The Demand In The Global Male Hypogonadism Market?

The rise in infertility rates is predicted to fuel the expansion of the male hypogonadism market in the future. Infertility is a term used to describe a condition that hinders the functioning of the male or female reproductive system, characterized by the failure to conceive after a year or more of regular, unprotected sexual intercourse. Male hypogonadism, which can result in diminished sperm production and infertility, is one of the possible culprits of male infertility. Therefore, the escalating incidence of male infertility is anticipated to stimulate the development of the male hypogonadism market. For example, the Office for National Statistics, a government department in the UK, reported in February 2024 that the total fertility rate (TFR) had risen to 1.49 children per woman in 2022, compared to 1.55 in 2021. Therefore, a surge in infertility rates is propelling the growth of the male hypogonadism market.

### Who Are The Leading Players In The Male Hypogonadism Market?

Major players in the Male Hypogonadism include:

- Pfizer Inc.
- Bayer AG
- Eli Lilly and Company Ltd.
- Endo International plc.
- Merck & Co. Inc.
- Ferring Pharmaceuticals
- Finox Biotech AG
- Teva Pharmaceutical Industries Ltd.
- AbbVie Inc.
- Perrigo Company plc.

### What Are Some Emerging Trends In The Male Hypogonadism Market?

A prominent trend emerging in the male hypogonadism market revolves around product innovations. Companies within this market are producing new, innovative products in an effort to maintain their competitive market status. For example, in June 2022, the US-based biotechnology company Halozyme introduced Tlando, an orally administered treatment for testosterone replacement therapy in male hypogonadism. Tlando is a prescribed medication consisting of testosterone which holds the distinction of being the first oral testosterone treatment to gain FDA approval. It is designed to treat adult men who, due to certain medical conditions, have low or no testosterone.

### Analysis Of Major [Segments Driving The Male Hypogonadism](#) Market Growth

The male hypogonadism market covered in this report is segmented –
