

# Growing Cyber Threats Propel DevSecOps Consulting into Core Role of U.S. Digital Strategy

*Rising cyber threats are driving rapid adoption of DevSecOps consulting in the U.S. as organizations modernize pipelines for faster, & secure software delivery.*

MIAMI, FL, UNITED STATES, November 24, 2025 /EINPresswire.com/ -- The momentum behind DevSecOps accessing in the U.S. continues to build as companies grapple with increasing cyber threats, complex compliance requirements, and the fast-evolving nature of cloud-native development. Security measures applied only at the final stage of software cycles can no longer keep up with rapid deployment demands, and this is where [DevSecOps consulting](#) becomes essential, driving a shift toward integrated security models that identify risks early. This represents a broader modernization initiative focused on automation, proactive defense, and more resilient operations.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

In this landscape, IBN Technologies is supporting organizations by refining automated security assessments, optimizing CI/CD practices, and ensuring vulnerabilities are uncovered far earlier in the process. Their DevSecOps consulting approach empowers teams to reduce risk without compromising delivery speed. As the economic and operational consequences of cyber incidents escalate, DevSecOps consulting has become a vital approach to maintaining secure, efficient, and innovative-friendly workflows reinforcing the value of partners like IBN Technologies.

Advance your secure development journey with tailored DevSecOps consulting support today

## Critical Pressure Points Shaping Modern Development

As digital ecosystems evolve, organizations must manage accelerating development timelines while securing distributed and automated environments. Legacy security measures cannot keep pace, resulting in operational strain and heightened vulnerability. These gaps are driving a rapid shift toward DevSecOps consulting-focused approaches.

- Siloed security efforts fail to protect rapidly evolving pipelines.
- Cloud-native systems add layers of complexity that challenge consistent security.
- Compliance expectations now require ongoing monitoring that many teams cannot sustain.
- Manual assessments lag the frequency of automated deployments.
- Limited collaboration between key teams delays threat remediation.
- Growth in APIs, microservices, and external integrations broadens exposure.

## Key Services Offered by the IBN Tech DevSecOps Platform

IBN Tech offers a complete ecosystem designed to embed security across development cycles, addressing common hurdles around risk management, compliance, and operational efficiency through advanced DevSecOps consulting programs.

- DevSecOps Assessment & Roadmap: A maturity examination surfaces tool, culture, and pipeline vulnerabilities, outlining a structured roadmap for immediate upgrades and extended improvements.
- Secure CI/CD Integration: Integrating SAST, SCA, and DAST through SonarQube, Fortify, and Snyk enables automated security testing and policy enforcement throughout the CI/CD lifecycle.
- Secure Cloud DevOps Pipelines: “Policy as code” techniques secure AWS and Azure environments, eliminating misconfigurations and ensuring cloud infrastructure remains compliant and protected.
- Secure Code Practices & Developer Enablement: Secure coding frameworks, focused training, and triage workflows equip developers with precise, actionable guidance for addressing vulnerabilities.
- Governance, Compliance & Reporting: Automated audit evidence for SOC 2, ISO 27001, GDPR, HIPAA, and other standards reduces audit complexity and enhances transparency.

## Client Success: Secure Development, Faster Delivery

Organizations adopting DevSecOps consulting have achieved stronger security postures while speeding up their software delivery cycles.

- A rapidly scaling company enhanced its CI/CD environment by adding automated testing capabilities, proactive monitoring, and built-in compliance validation.

- This upgrade cut early-stage critical vulnerabilities by 40%, shortened release cycles by 30%, and provided teams with a secure foundation for continuous innovation.

## Future-Ready Security for Digital Growth

As digital transformation accelerates, enterprises are shifting toward development models where security is integrated from inception through deployment. Cloud-native expansion, evolving APIs, and automated release pipelines are amplifying the need for frameworks built around predictive analytics and preventive controls. According to MRFR, the global DevSecOps consulting market currently valued at \$6.59 billion is projected to climb to \$23.5 billion by 2032, highlighting its strategic importance.

In this evolving environment, companies are expected to prioritize platforms and partners that support secure, efficient, and scalable development pipelines. IBN Technologies stands at the forefront of this shift, enabling organizations to enhance observability, automate compliance checks, and continually refine CI/CD operations. As digital ecosystems grow more complex, firms adopting mature DevSecOps consulting strategies will be better positioned to safeguard critical systems and sustain rapid innovation.

### About IBN Technologies

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction

documentation, middle and back-office support, and data entry services.□□□

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.□□
