U.S. Enterprises Adopt DevSecOps Consulting Services Amid Rising Cyber Threats

DevSecOps consulting services help U.S. enterprises integrate security across development and operations, ensuring compliance, faster releases.

MIAMI, FL, UNITED STATES, November 25, 2025 /EINPresswire.com/ -- The DevSecOps consulting solutions market is rapidly growing in the U.S. as industries prioritize security in development and operations. Companies in finance, healthcare, retail, government, and technology are adopting these [DevSecOps consulting services](#) to protect sensitive data, ensure regulatory compliance, and manage rising cyber threats. With cloud adoption, CI/CD, and digital transformation, organizations need automated, built-in security to catch vulnerabilities early. DevSecOps consulting services help businesses

IBN Technologies: Expert in Outsourced Finance and Accounting Services

implement secure-by-design practices, choose the right tools, and build a security-focused culture, reducing breach risks, speeding up software delivery, and cutting costs. Industries are increasingly investing in these DevSecOps consulting services to stay secure, compliant, and competitive.

By leveraging DevSecOps consulting services, companies can seamlessly integrate security into every stage of the software lifecycle, from development to deployment and operations. Consultants guide organizations in automating security checks, monitoring vulnerabilities, and embedding best practices across teams, with IBN Technologies helping ensure consistent protection against cyber threats. This approach not only strengthens data security but also improves operational efficiency, accelerates release cycles, and builds customer trust. As digital transformation accelerates, industries recognize that investing in DevSecOps consulting services

is essential for resilience, compliance, and long-term business growth.

Critical Security Hurdles in Modern Software Development
As organizations accelerate digital transformation, integrating security across development and operations has become increasingly complex. Many businesses struggle with fragmented processes, regulatory compliance, and rising cyber threats, while managing a growing stack of tools and limited in-house expertise. These challenges slow detection, increase risk exposure, and make embedding security into agile workflows difficult, highlighting the urgent need for specialized DevSecOps consulting services guidance.

• Fragmented security in agile and CI/CD pipelines leaves vulnerabilities undetected.
• Compliance with HIPAA, PCI DSS, and NIST is complex and resource-intensive.
• Rising cyber threats, including ransomware and insider attacks, endanger data.
• Overload of security tools creates inefficiencies and gaps in protection.
• Manual processes slow threat detection and response, increasing breach risk.
• Lack of DevSecOps expertise hinders embedding security across teams and workflows.

Key Services Offered by the IBN Tech DevSecOps Platform
IBN Tech provides a comprehensive range of DevSecOps consulting services, embedding security seamlessly into development to tackle critical industry challenges:

 DevSecOps Assessment & Roadmap: Conducts a maturity evaluation to uncover gaps in tooling, culture, and pipeline processes, delivering a detailed roadmap for both immediate and long-term improvements.
 Secure CI/CD Integration: Implements security tools such as SAST, SCA, and DAST within CI/CD pipelines (including SonarQube, Fortify, and Snyk), enabling automated scans and compliance enforcement.
 Secure Cloud DevOps Pipelines: Protects AWS and Azure cloud environments using "policy as code," mitigating misconfigurations and ensuring secure operational practices.
 Secure Code Practices & Developer Enablement: Equips developers with secure coding standards, focused training, and triage workflows that provide actionable vulnerability insights.
 Governance, Compliance & Reporting: Automates evidence collection to support adherence to SOC 2, ISO 27001, GDPR, HIPAA, and other frameworks, significantly reducing audit workload.

Client Success: Enhanced Security, Accelerated Delivery
IBN Tech's DevSecOps consulting services have helped organizations deliver software faster while embedding security across every stage of the development lifecycle.

• A top-tier financial services firm revamped its development pipeline by incorporating automated security testing, continuous monitoring, and compliance validation directly into its

CI/CD workflows.
• As a result, the company saw a 40% reduction in critical vulnerabilities during early development, shortened release cycles by 30%, and enabled teams to innovate confidently without sacrificing security.

Next-Gen DevSecOps Strategies
As companies accelerate their digital transformation initiatives, implementing comprehensive security processes has become critical for achieving secure, compliant, and agile software delivery. MRFR estimates that the DevSecOps consulting services market, valued at $6.59 billion in 2022, is projected to reach $23.5 billion by 2032, underscoring rapid industry growth and the widespread need for integrated security and compliance across sectors. Forward-looking organizations are increasingly prioritizing continuous security automation, real-time vulnerability monitoring, and developer enablement, ensuring secure-by-design practices are embedded across every stage of the software lifecycle. Independent analysts note that enterprises adopting these approaches see measurable reductions in breach risk, faster release cycles, and stronger regulatory compliance, creating a foundation for operational efficiency and long-term customer trust.

Looking ahead, DevSecOps consulting services adoption will continue to accelerate as organizations contend with complex cloud environments, hybrid infrastructures, and evolving regulatory mandates. By leveraging advanced automation, integrated security pipelines, and governance frameworks, businesses can proactively identify and remediate vulnerabilities, streamline audit processes, and scale secure software delivery without compromise. IBN Technologies' DevSecOps platform equips enterprises to meet these future challenges head-on, enabling innovation at speed while maintaining robust security and compliance standards.

About IBN Technologies

IBN Technologies LLC is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling

seamless digital transformation and operational resilience.􀀀􀀀􀀀􀀀

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.􀀀􀀀􀀀􀀀

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.􀀀􀀀􀀀
