What Are The Factors Driving The Human Papillomavirus (HPV) Vaccine Market?

The escalating occurrence of diseases related to HPV is anticipated to stimulate [the expansion of the HPV vaccine market](#). HPV-related diseases are virus-induced infections often leading to warts on the skin or mucous membranes. The HPV vaccine, designed to target specific HPV subtypes, manages the danger of HPV infection and recurrent diseases. For example, data from the National Cancer Institute of the U.S Department of Health and Human Services suggests that approximately 13,960 American women will be diagnosed with severe cervical cancer in February 2023, with an expected 4,310 deaths resulting from this illness in the U.S during 2023. Furthermore, new cases of cervical cancer were detected at a rate of 7.7 per 100,000 women each year and an annual mortality rate of 2.2 per 100,000 women. Hence, the escalation in HPV-related diseases is fueling the expansion of the HPV vaccine market.

Who Are The Major Players In The Human Papillomavirus (HPV) Vaccine Market?

Major players in the Human Papillomavirus (HPV) Vaccine include:

- Johnson & Johnson Co
- Merck & Co Inc.
- Novartis AG
- Sanofi SA
- GlaxoSmithKline Plc
- AstraZeneca Pharma Ltd.
- Astellas Pharma Inc.
- CSL Limited
- UCB SA
