

Ellie.ai Achieves ISO 27001:2022 Certification, Strengthening Enterprise-Grade Data Security for Global Customers

Ellie.ai achieved ISO 27001:2022 certification, validating enterprise-grade data security and compliance standards for global customers.

HELSINKI, UUSIMAA, FINLAND,

November 25, 2025 /

EINPresswire.com/ -- Ellie Technologies

Inc, primarily known as Ellie.ai, the

leading full-stack data modeling platform, today announced it has achieved ISO/IEC 27001:2022 certification, the internationally recognized standard for information security management systems (ISMS). The certification was conducted and awarded by Prescient Security, a global leader in security auditing and compliance services.

Our customers rely on Ellie.ai to design, govern, and scale data products across the most complex and regulated environments. Achieving certification validates the trust our clients place in us."

Sami Hero, CEO of Ellie Technologies

This milestone underscores Ellie.ai's ongoing commitment to the highest levels of security, governance, and operational excellence as the company continues to serve some of the world's most demanding enterprises across financial services, telecommunications, and industrial sectors.

"Our customers rely on Ellie.ai to design, govern, and scale data products across the most complex and regulated environments," said Sami Hero, CEO of Ellie Technologies. "Achieving ISO 27001 certification validates the trust our

enterprise clients place in us and demonstrates our commitment to protecting their data with industry-leading security and compliance standards."

ISO 27001 certification requires rigorous, independent validation of a company's security program, covering areas such as risk management, access controls, secure development, incident response, vendor management, and continuous monitoring. Ellie's certification confirms that its internal processes, infrastructure, and operational controls meet global best practices for
