# DevSecOps Services Enable Secure, Agile Software Delivery for U.S. Enterprises

IBN Technologies' DevSecOps services help U.S. enterprises deliver secure, compliant, & agile software, embedding security throughout the development lifecycle.

MIAMI, FL, UNITED STATES, November 26, 2025 /EINPresswire.com/ -- In today's fast-paced digital landscape, the demand for rapid software delivery has reached unprecedented levels. However, accelerating development often introduces significant security risks that organizations must carefully manage. DevSecOps services are transforming the way businesses approach software creation by embedding security measures into every stage of the development lifecycle, including planning, coding, testing, and deployment. This holistic approach ensures that applications are secure from inception rather than being treated as an afterthought, helping organizations prevent costly vulnerabilities and protect their reputations.
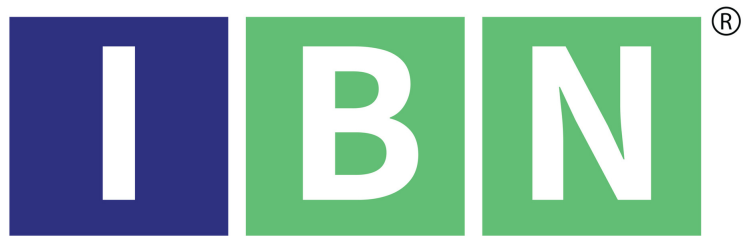

IBN Technologies: Expert in Outsourced Finance and Accounting Services

Understanding the critical importance of secure, agile development, IBN Tech is leading the charge in implementing DevSecOps services practices to optimize its software delivery processes. By aligning development, security, and operations teams within a cohesive framework, IBN Tech fosters innovation while upholding stringent security protocols. This strategic evolution not only enhances the company's technological solutions but also demonstrates its dedication to providing reliable and secure services in an increasingly intricate digital ecosystem.

Discover how secure DevSecOps services can transform your software delivery today.

Industry Challenges Demanding Immediate Strategic Response

Today's software development landscape faces critical security challenges that traditional approaches can no longer address:
• Fragmented security tool chains producing silos and blind spots in processes
• Manual compliance procedures causing release delays and increasing audit risk
• Developer resistance to security checkpoints perceived as workflow bottlenecks
• Inability to bridge skills gaps, leaving teams under-equipped for DevSecOps
• Difficulty integrating Infrastructure as Code scanning and Static Application Security Testing into existing CI/CD pipelines

Key Services Offered by the IBN Tech DevSecOps Platform:

IBN Tech delivers a comprehensive portfolio of DevSecOps services designed to embed security throughout the software development lifecycle, tackling critical challenges:

DevSecOps Assessment & Roadmap: A detailed maturity scan evaluates tooling, culture, and pipeline deficiencies, generating a structured roadmap for both immediate enhancements and long-term strategic improvements.

Secure CI/CD Integration: Security measures such as SAST, SCA, and DAST are seamlessly incorporated into CI/CD pipelines using platforms like SonarQube, Fortify, and Snyk, automating vulnerability scans and enforcing compliance consistently.

Secure Cloud DevOps Pipelines: Cloud environments on AWS and Azure are fortified via "policy as code," preventing misconfigurations and ensuring operations remain secure and compliant.

Secure Code Practices & Developer Enablement: Developers are trained and guided through secure coding standards, hands-on training programs, and triage workflows that provide actionable feedback on vulnerabilities.

Governance, Compliance & Reporting: Automated evidence collection simplifies adherence to SOC 2, ISO 27001, GDPR, HIPAA, and other frameworks, reducing manual audit efforts while maintaining full compliance.

Client Success: Strengthened Security, Accelerated Delivery

DevSecOps services have helped organizations speed up software delivery while embedding security throughout the development lifecycle.
• A top financial services firm revolutionized its development pipeline by integrating automated security testing, continuous monitoring, and compliance validations directly into its CI/CD

workflows.

• This initiative resulted in a 40% reduction in critical vulnerabilities during the early stages of development, cut release cycles by 30%, and enabled teams to innovate confidently without compromising security.

A Strategic Investment in Security and Innovation

As organizations accelerate their digital transformation efforts, implementing comprehensive security processes has become essential to ensuring secure, compliant, and agile software delivery. According to MRFR, the DevSecOps market, valued at $6.59 billion in 2022, is projected to expand to $23.5 billion by 2032, emphasizing the rapid growth of this sector and the industry-wide demand for security and compliance solutions.

This expansion is driven by widespread cloud adoption, increasingly sophisticated cyber threats, and a cross-industry push—from IT and telecom to healthcare, government, and retail—toward automation and operational resilience. IBN Technologies is positioned to help clients turn these ambitions into reality. Its developer-focused DevSecOps services platform enables companies to implement cloud-native security, automate continuous compliance, and deliver production-ready code that keeps pace with business innovation.

By integrating Policy as Code, SAST, IaC scanning, and automated evidence collection for global compliance frameworks, IBN Technologies delivers risk mitigation, audit assurance, and operational flexibility that align with the most promising growth trajectories identified in leading market analyses. In the era of continuous delivery and relentless cyber threats, security cannot be an afterthought. Partnering with IBN Technologies represents a decisive investment in security automation, efficiency, and competitive advantage.

About IBN Technologies🔷🔷🔷🔷🔷🔷🔷

IBN Technologies LLC is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR,🔷vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services,

business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.
