

# DevSecOps Services Accelerate Secure and Compliant Software Delivery for U.S. Companies

*IBN Tech's DevSecOps Services help U.S. companies secure, accelerate, and streamline software delivery while ensuring compliance and operational agility.*

MIAMI, FL, UNITED STATES, November 27, 2025 /EINPresswire.com/ -- In the contemporary digital era, businesses face immense pressure to deliver software quickly, but this speed often carries significant security risks. [DevSecOps Services](#) are redefining how companies approach development by embedding security measures at every stage of the software lifecycle, including planning, coding, testing, and deployment. This integrated methodology ensures that security is foundational to application design, rather than an afterthought, helping organizations avoid costly breaches and reputational setbacks.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

Recognizing the vital need for secure, agile development, IBN Tech is pioneering the adoption of DevSecOps Services to optimize its software delivery processes. By aligning development, security, and operations teams within a coordinated framework, IBN Tech fosters innovation without compromising security. This strategic initiative not only strengthens the company's technical offerings but also highlights its commitment to delivering trustworthy solutions in an increasingly complex digital landscape.

## Industry Challenges Demanding Immediate Strategic Response

The contemporary software development environment faces complex security challenges beyond the reach of traditional solutions:

- Fragmented security tool ecosystems generating blind spots and operational silos
- Manual compliance workflows resulting in delayed releases and audit risks
- Developers resisting security gates, seeing them as obstructive to progress
- Persistent skills shortages, with teams inadequately staffed for DevSecOps Services
- Difficulty incorporating Infrastructure as Code scanning and Static Application Security Testing into existing CI/CD pipelines

## IBN Tech DevSecOps Platform – Core Services:

IBN Tech provides a full DevSecOps Services suite, integrating security into the development lifecycle to address frequent operational and compliance challenges:

□ DevSecOps Assessment & Roadmap: Through a maturity scan, tooling, culture, and pipeline gaps are uncovered, producing a structured roadmap for both near-term fixes and long-term DevSecOps objectives.

□ Secure CI/CD Integration: Security testing tools like SAST, SCA, and DAST are embedded into CI/CD pipelines using SonarQube, Fortify, and Snyk, enabling automated scanning and continuous compliance enforcement.

□ Secure Cloud DevOps Pipelines: AWS and Azure environments are secured with "policy as code," preventing misconfigurations and maintaining strict security standards.

□ Secure Code Practices & Developer Enablement: Developers are enabled with secure coding practices, practical training sessions, and triage workflows that provide actionable vulnerability remediation guidance.

□ Governance, Compliance & Reporting: Automated evidence gathering simplifies SOC 2, ISO 27001, GDPR, HIPAA, and other compliance processes, minimizing audit overhead while maintaining full regulatory alignment.

## Client Success: Secure Software, Rapid Innovation

Organizations are achieving faster software delivery while strengthening security at all stages of development through DevSecOps Services.

- A leading financial services firm overhauled its development pipeline, integrating automated security testing, continuous monitoring, and compliance assessments directly into its CI/CD workflows.
- The company achieved a 40% reduction in critical vulnerabilities in early development, accelerated release cycles by 30%, and enabled teams to innovate freely while maintaining strong security standards.

## A Strategic Investment in Security and Innovation

As companies accelerate digital initiatives, robust security processes are critical for achieving secure, compliant, and agile software delivery. MRFR estimates the DevSecOps Services market at \$6.59 billion in 2022, expected to reach \$23.5 billion by 2032, underscoring both the rapid growth of the sector and the widespread demand for integrated security and compliance across industries.

The momentum is driven by rapid cloud adoption, evolving cyber threats, and a cross-sector push from IT, telecom, healthcare, government, and retail toward automation and resilience. IBN Technologies is strategically positioned to support organizations in realizing these objectives. Its developer-focused DevSecOps platform empowers businesses to implement cloud-native security, automate continuous compliance, and deliver production-ready code that keeps pace with evolving business requirements.

Leveraging Policy as Code, SAST, IaC scanning, and automated compliance evidence collection for global frameworks, IBN Technologies ensures risk mitigation, audit reliability, and operational agility that mirror the most attractive growth paths highlighted in leading market reports. In an era defined by continuous delivery and persistent cyber threats, security cannot be secondary. Partnering with IBN Technologies represents a deliberate investment in security automation, operational efficiency, and competitive distinction.

### About IBN Technologies

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are

enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.□□□□

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.□□
