DevSecOps Services Drive Secure, Cloud-Native Software Deployment Across U.S. Enterprises

IBN Tech's DevSecOps Services help U.S. companies deliver secure, cloud-native software faster, automating compliance and mitigating cyber risks.

MIAMI, FL, UNITED STATES, November 27, 2025 /EINPresswire.com/ -- In today's accelerated digital environment, the pressure to deliver software quickly has never been more significant. Yet, this speed often introduces considerable security risks for organizations. DevSecOps Services are transforming software development by embedding security into every phase of the lifecycle from initial planning and coding to rigorous testing and final deployment. This proactive approach ensures that applications are inherently secure, helping companies prevent expensive vulnerabilities and safeguard their reputations.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

Appreciating the necessity for both agility and security in development, IBN Tech is at the forefront of implementing DevSecOps Services practices to strengthen its software delivery processes. By unifying development, security, and operations teams within a single framework, IBN Tech promotes innovation while upholding high security standards. This strategic alignment not only enhances the company's technological capabilities but also reinforces its promise to deliver reliable and secure solutions in an increasingly challenging digital world.

Industry Challenges Demanding Immediate Strategic Response

Software development today is under pressure from severe security challenges that conventional methods fail to resolve:

• Disparate security tools producing blind spots and fragmented workflows
• Manual compliance processes delaying releases and increasing audit exposure
• Developer pushback on security gates, perceived as workflow bottlenecks
• Teams lacking sufficient DevSecOps expertise, leaving critical skill gaps
• Complexity in implementing Infrastructure as Code scanning and Static Application Security Testing in current CI/CD pipelines

Comprehensive DevSecOps Services by IBN Tech:

IBN Tech's DevSecOps Services platform delivers a complete range of solutions that integrate security directly into the development lifecycle, addressing major challenges organizations face today:

 DevSecOps Assessment & Roadmap: A maturity scan evaluates existing tools, organizational culture, and pipeline configurations, generating a clear roadmap for immediate remediation and sustained improvement.

 Secure CI/CD Integration: Security solutions including SAST, SCA, and DAST are embedded within CI/CD pipelines using tools like SonarQube, Fortify, and Snyk, automating scans and ensuring continuous regulatory compliance.

 Secure Cloud DevOps Pipelines: AWS and Azure cloud environments are secured via "policy as code," removing misconfigurations and enforcing best practices for secure operations.

 Secure Code Practices & Developer Enablement: Developers are empowered through comprehensive secure coding standards, targeted training programs, and triage workflows delivering actionable insights for remediation.

 Governance, Compliance & Reporting: Automated compliance evidence collection supports frameworks such as SOC 2, ISO 27001, GDPR, and HIPAA, reducing manual effort while ensuring audit-readiness.

Client Success: Accelerated Delivery and Enhanced Security

DevSecOps Services are helping organizations deliver software more rapidly while ensuring security is embedded throughout the development lifecycle.

• A major financial services company redefined its development pipeline by adding automated security testing, continuous monitoring, and compliance validations directly within CI/CD workflows.
• This transformation led to a 40% drop in critical vulnerabilities in early development, a 30% faster release cycle, and empowered teams to pursue innovation without sacrificing security.

A Strategic Investment in Security and Innovation

As digital transformation accelerates, comprehensive security practices are vital for enabling secure, compliant, and agile software delivery. MRFR projects the DevSecOps market, valued at $6.59 billion in 2022, to grow to $23.5 billion by 2032, highlighting the sector's rapid expansion and the cross-industry imperative for security and compliance.

This growth is driven by surging cloud adoption, increasingly sophisticated cyber threats, and an industry-wide push across IT, telecom, healthcare, government, and retail toward automation and operational resilience. IBN Technologies is well-positioned to guide organizations in achieving these goals. Its developer-centric DevSecOps Services platform allows businesses to integrate cloud-native security, automate continuous compliance, and deliver production-ready code that supports ongoing innovation.

By combining Policy as Code, SAST, IaC scanning, and automated compliance evidence captured for global frameworks, IBN Technologies delivers risk mitigation, audit assurance, and operational agility, aligned with the most promising growth paths identified in leading market research. In today's environment of continuous delivery and persistent cyber threats, security cannot be treated as an afterthought. Partnering with IBN Technologies represents a decisive investment in automation, efficiency, and competitive advantage.

About IBN Technologies

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow

automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.⬜⬜⬜⬜

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.⬜⬜⬜⬜
