□ Featured models include:

- AUTO10 Plus Hands-Free Slow Juicer

□ Hands-Free Slow Juicer AUTO10 Plus
The AUTO10 Plus stands out with its innovative 4L extension hopper, creating the largest hopper size available compared to competing slow juicers. This expanded capacity allows customers to juice significantly more ingredients at once with minimal prep. By simply attaching the hopper extension, users can load full recipes — including whole fruits and vegetables — and let the juicer operate hands-free.

Designed for ultimate convenience, the AUTO10 Plus features:

- 4L hopper that becomes the largest hopper in the slow juicer market
- Extra-large loading capacity perfect for large-batch juicing
- Save more time with even less prep work
- The auto hopper cuts and feeds ingredients directly into the juicer.
- Durable stainless-steel blade to chop even tough produce
- Cold-press technology that maximizes yield and preserves nutrients
- The cleanup is very easy thanks to our simple design and included cleaning tools.

These features make the AUTO10 Plus ideal for families, wellness routines, and anyone who prefers effortless, hands-free juicing with minimal preparation.

Nama J2 requires an additional purchase of a large-capacity hopper for \$119, while Kuvings includes a high-capacity hopper as standard with the Plus model, which features one of the largest hoppers in its class.

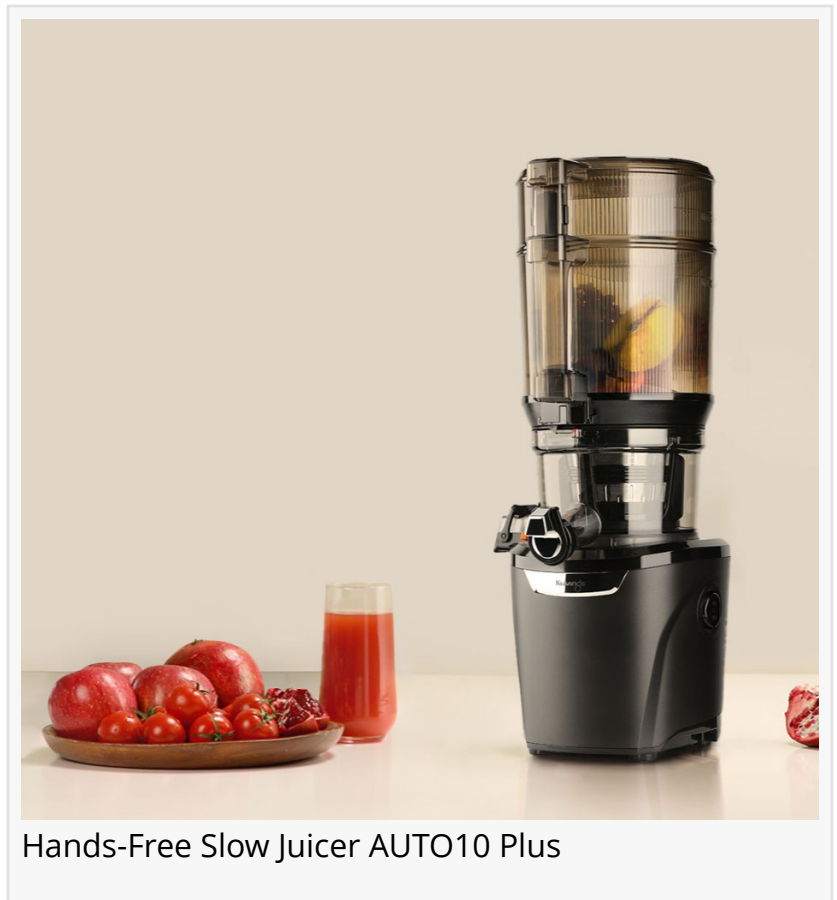

The Kuvings AUTO10 Plus comes with a 4L (135 oz) hopper, making batch juicing more convenient and allowing users to load a greater amount of ingredients at once.
