

Polymer Coated Fabrics Industry Analysis Report 2025: Key Trends, Drivers, and Forecast Insights

*The Business Research Company's
Polymer Coated Fabrics Global Market
Report 2025 – Market Size, Trends, And
Forecast 2025-2034*

LONDON, GREATER LONDON, UNITED
KINGDOM, November 28, 2025

/EINPresswire.com/ -- [Polymer Coated
Fabrics Market](#) Growth Forecast: What
To Expect By 2025?

In recent years, the market size of polymer coated fabrics has witnessed robust expansion. The market is projected to rise from \$22.65 billion in 2024 to \$23.8 billion in 2025, with a compound annual growth rate (CAGR) of 5.1%. The historical growth has been driven by factors such as

industrial usage, rising demand in the automotive industry, outdoor and recreational equipment, applications in architecture, the medical and healthcare sectors, and consumer goods.

*The Business Research
Company*

The market size for polymer coated fabrics is forecasted to experience a substantial increase in the forthcoming years. The projected value by the year 2029 is \$30.47 billion, with an anticipated compound annual growth rate (CAGR) of 6.4%. Factors that will contribute to this expected growth encompass trends towards sustainability, advancements in

technology, an increase in healthcare infrastructure, the expansion of e-commerce, urbanization and infrastructural developments, and the strength exhibited in the outdoor and sports sectors. Key trends during this growth period would consist of the customization of design and aesthetics, the inclusion of smart textiles, their use in the medical and healthcare textile sector, and strategic collaborations.

What Are Key Factors Driving The Demand In The Global Polymer Coated Fabrics Market?

The expanding conversion of rural areas into residential, commercial, and industrial spaces due to urbanization is a major contributing factor to the growth of the polymer-coated fabrics market. Such fabrics find widespread application in various sectors, owing to urbanization which includes usage in household and commercial items such as carpets, airbags, geotextiles, industrial fabrics, and in numerous areas like architecture, defense, transportation, space, healthcare, and sports. They are also used in making mats, bedding products, curtains, and different upholstery items. The UN, in one of its reports, predicted that India's urban population would hit 543 million by 2025. It also projected that the urban populace of China would escalate to 1.05 billion by 2035. As a result, it can be inferred that accelerated urbanization is a significant catalyst for the burgeoning market of polymer-coated fabrics.

Who Are The Leading Players In The Polymer Coated Fabrics Market?

Major players in the Polymer Coated Fabrics include:

- DuPont
- BASF
- Covestro
- Dow
- Huntsman
- Evonik
- Solvay
- Eastman
- Continental AG
- Trelleborg AB

What Are The Key Trends Shaping The Polymer Coated Fabrics Industry?

The evolution of technology is a significant trend gaining traction in the polymer-coated fabrics industry. Major industry players are introducing cutting-edge technologies to maintain their market dominance. For instance, Rivertex Technical Fabrics Group, a Netherlands-headquartered supplier of coated textiles and unsupported films, unveiled Rivercyclon in March 2022. This innovation is an eco-friendly, recyclable, lightweight, and cost-efficient alternative to PVC-coated fabrics. Rivercyclon is constructed from a singular polymer, without any plasticizers or other contaminants. Moreover, it is up to 40% lighter than its PVC-coated counterparts. Rivercyclon also boasts strong resistance to ultraviolet rays and exceptional welding strength. As per the company's press announcement, Rivercyclon is reasonably priced and available in widths of up to 320 cm.

Analysis Of Major Segments Driving The [Polymer Coated Fabrics Market Growth](#)

The polymer coated fabrics market covered in this report is segmented –

- 1) By Product: Vinyl Coated Fabrics, PU Coated Fabrics, PE Coated Fabrics, Other Products
- 2) By Material Type: Knitted, Woven, Non-Woven
- 3) By Application: Transportation, Protective Clothing, Roofing, Awnings And Canopies, Furniture

And Seating, Others Applications

4) By End Use Industries: Automobile, Aerospace, Marine, Chemical Processing, Military, Other End Use Industries

Subsegments:

1) By Vinyl Coated Fabrics: PVC Coated Fabrics, Vinyl Laminated Fabrics

2) By PU Coated Fabrics: Polyurethane Coated Polyester Fabrics, Polyurethane Coated Nylon Fabrics

3) By PE Coated Fabrics: Polyethylene Coated Woven Fabrics, Polyethylene Coated Non-Woven Fabrics

4) By Other Products: Silicone Coated Fabrics, Rubber Coated Fabrics, Teflon Coated Fabrics
