linked to escalating demand spurred by e-commerce and last-mile delivery. Likewise, a rising need in the sectors of warehousing and industrial automation, a growing preference for the use of lightweight, high-strength materials in the manufacture of hand trucks and dollies, and amplified focus on workplace safety and ergonomic design has also contributed.

We can forecast vigorous growth within the hand truck and dolly market in the subsequent years, anticipated to reach \$1.45 billion by 2029 with a compound annual growth rate (CAGR) of 5.8%. Factors for this projected growth include

prevalent use of online sales platforms for material handling equipment, infrastructural and logistics advancements in evolving markets, and the rising requirement for portable and high-performance material handling tools. In the forecasted timeframe, several trends are expected to emerge such as the incorporation of automation in warehousing and material handling, technological evolution in electric-powered dollies catering to heavy-duty applications, advancements in technology, fabrication of lightweight and sturdy materials, application of antimicrobial coatings designed for cold chain logistics, and the introduction of ergonomic designs to bolster workplace safety.
