The global AIOps market size was valued at \$26.33 billion in 2020, and is projected to reach \$644.96 billion by 2030, registering a CAGR of 37.90% from 2021 to 2030.

The AIOps market is mainly segmented on the basis of component, deployment mode, and application & industry verticals. Based on component, the market is segmented into platform and service, while on the basis deployment mode, the market is segmented into on premise and cloud. On the basis of application, it is segmented into real-time analytics, infrastructure management, network and security management, application performance management, and others. By industry verticals, the market is segmented into BFSI, healthcare and life sciences, retail and consumer goods, telecom and it, manufacturing, government, media and entertainment, and others. By region, the AIOps market is studied across North America, Europe, Asia-Pacific, and LAMEA.

Asia-Pacific is projected to portray the fastest CAGR of 40.3% during the forecast period, as the region is witnessing dynamic changes within the adoption of automation in various business functions across verticals. Some of the key companies mentioned within the report are BM,

Splunk, CA Technologies, VMware, Micro Focus, HCL Technologies, Appdynamics, BMC Software, Moogsoft, and Fixstream.

Based on region, North America accounted for the highest market share in terms of revenue in 2020, accounting for more than two-fifths of the global AIOps market, and is expected to continue its dominance by 2030. This is due to technologically advanced economy and growing convergence of varied technologies like AI, ML, big data, and analytics in this region.

Based on component, the platform segment accounted for the highest share in 2020, contributed to more than four-fifths of the global AIOps market, and is expected to continue its leadership status during the forecast period. This is owing to increasing connectivity within the IT operations, growing demand for image recognition system and used for growth of knowledge. However, the services segment is estimated to witness the highest CAGR of 40.6% from 2021 to 2030. This is owing to advancement in AI technologies and adoption of varied deployments.

Based on deployment mode, the on premise segment held the highest share in 2020, contributing to around three-fourths of the global AIOps market, and is estimated to maintain its lead position during the forecast period. On the premise AI Ops market is more reliable because it is taken into account by the IT teams that provide control and reliability, which propels the growth of the market. On the other hand, the cloud segment is projected to manifest the fastest CAGR of 39.1% from 2021 to 2030. This is attributed to the fact that cloud is way more scalable than on-premises deployment.
