

Carter Publishing, Co. Launches with Groundbreaking Publication on Non-Fuel Electromagnetic Engines

Presenting The Inner Workings of The World's First Non-Fuel Electric Auto Engine! Uses No Fuel Uses No oil and never needs a Charging Station!

BRANSON, MO, UNITED STATES, December 4, 2025 /EINPresswire.com/ -- A new force in technical publishing has arrived. Carter Publishing, Co., based in Branson, Missouri, launches with a mission to spotlight breakthrough innovations that redefine the future of energy and engineering.

The company's debut title introduces a pioneering study of the [Trump Electric Engine](#)—a revolutionary design in electromagnetic power transmission. Unlike conventional electric motors or combustion engines, the Trump [Electric Engine](#) harnesses the raw pulling force of electromagnets to generate rotary motion, offering a new pathway for delivering mechanical energy to a wide range of applications in industry, transportation, and beyond.

Harold Carter - Inventor of The Trump Electric Engine

"Carter Publishing was founded to share knowledge that sparks progress," said Harold Carter, founder of Carter Publishing. "The Trump Electric Engine is more than an invention—it's a bold vision for the future of power technology. By publishing this research, we aim to inspire engineers, innovators, and problem-solvers worldwide."
