

# LARUS.NET Builds on Its Global Reputation as a Trusted IPv4 Leasing and IP Management Provider

---

HONG KONG, HONG KONG, December 4, 2025 /EINPresswire.com/ -- LARUS.NET, a trusted global provider of IPv4 address solutions, today announced enhanced support and expanded service capabilities to help businesses worldwide secure reliable, compliant, and flexible IPv4 resources. As digital infrastructure needs grow, LARUS.NET continues to deliver straightforward, customer-focused solutions that remove complexity from acquiring and managing IP addresses.

LARUS.NET specializes in [IPv4 leasing](#), [IP address management](#), and IP brokerage services. With its established presence in the global internet resources industry, the company provides businesses with an efficient and transparent way to obtain IPv4 addresses without the delays or administrative obstacles associated with traditional RIR transfers.

## Fast & Flexible IPv4 Leasing

At the core of LARUS.NET's service portfolio is its on-demand IPv4 leasing model, which enables organizations to obtain IPv4 addresses through a simple, direct, and hassle-free process. Customers select their preferred IP block size, sign a service agreement, and receive a Letter of Authorization, allowing them to start using the IP range quickly.

LARUS.NET's leasing service is designed specifically for businesses that:

- Need IPv4 addresses without purchasing long-term assets
- Want to avoid complex registry transfer procedures
- Require quick deployment for network expansion
- Prefer flexible contract terms that can scale with their operations

By removing the need for lengthy approvals or registry interactions, LARUS.NET streamlines IP acquisition and allows businesses to focus on operations rather than resource bottlenecks.

Comprehensive IP Management for Organizations & IP Owners

LARUS.NET also provides full IP management services, ensuring that both IP users and IP owners are supported throughout the lifecycle of their address space.

For companies leasing addresses, LARUS.NET manages:

- Documentation
- Routing authorizations
- Technical support
- Administrative coordination

For IP owners, LARUS.NET offers a secure and efficient way to monetize unused IPv4 address space. IP holders can entrust their address blocks to LARUS.NET, which handles allocation, customer vetting, and resource management on their behalf.

This model benefits owners who want to generate recurring revenue without needing to manage the technical or operational workload internally.

#### Professional IPv4 Brokerage Services

In addition to leasing, LARUS.NET supports organizations that wish to buy or sell IPv4 address space. The company assists with:

- Market guidance
- Policy-compliant transfer procedures
- Documentation handling
- RIR-related processes

By combining technical expertise with administrative support, LARUS.NET ensures a smooth and secure experience for businesses navigating the global IPv4 marketplace.

#### A Customer-First Mission

LARUS.NET emphasizes clear communication, reliable service delivery, and simple processes — values reflected across its website and customer materials. Its mission is to help organizations access the IPv4 resources they need without unnecessary complexity or delays.

Whether a business requires a small subnet for a new project or large-scale ranges for global

operations, LARUS.NET provides tailored solutions that support long-term growth.

## About LARUS.NET

LARUS.NET is a global [IPv4 address solutions provider](#) offering IPv4 leasing, IP address management, and brokerage services. Since its establishment in 2016, the company has been committed to simplifying IPv4 acquisition and helping businesses deploy stable, efficient, and scalable network infrastructure. LARUS.NET serves companies worldwide seeking reliable, flexible, and transparent IP address solutions.
