

TSS Solutions Awarded GSA MAS Contract for Products, Parts, Services

TSS solidifies position as a top provider of products for mission-critical radar systems.

MELBOURNE, FL, UNITED STATES, December 5, 2025 /EINPresswire.com/ -- TSS Solutions has been awarded a Multiple Award Schedule (MAS) contracting vehicle by the General Services Administration (GSA), the focused procurement wing of the federal government. This award further establishes TSS, an Acorn Capital Management Company, as a top provider of products for mission-critical radar systems.

The small-business contract runs through September 7, 2030.

Using TSS Solutions' MAS contract 47QSMS25D00BZ, government agencies can now directly obtain TSS Solutions products, parts, and services under Special Item Number (SIN): 334511T – Telecommunications Equipment. The TSS MAS contract is government-wide, with an initial award period of five years, with three additional five-year option periods to follow, totaling a potential 20-year contract life.

The GSA MAS serves as a trusted procurement channel for government buyers, confirming that participating companies have undergone a rigorous review process and have demonstrated the capability, reliability, and performance required to support federal, state, and local missions.

"Earning a place on the GSA Schedule underscores the confidence government buyers can place in TSS Solutions," said Don DiFrisco, President and CEO of TSS Solutions. "It formalizes what our customers already know: that TSS delivers reliable, cost-effective radar solutions and sustainment support to keep critical defense systems mission-ready."

With decades of proven performance in radar and SATCOM sustainment, modernization, and
