

New ClickFunnels Discount Offers Scale Plan at \$99 for 3Months, Highlighting Up to \$492 in Savings for New Users

ClickFunnels offers a 3-month \$99 pricing for new users temporary access to the Scale Plan, normally \$197/month, to evaluate funnels, CRM, and email tools.

TX, UNITED STATES, December 9, 2025 /EINPresswire.com/ -- ClickFunnels, a web-based sales funnel and marketing platform, is now offering a 3-month discount offer that provides new users

with access to its Scale Plan for a flat \$99. Under standard pricing, the Scale tier is billed at \$197 per month, or \$591 over three months, meaning the promotion represents up to \$492 in short-term savings during the 90-day access period.

The ClickFunnels Discount \$99 for 3 Months is described in supporting documentation as a limited-time arrangement that temporarily lowers the effective cost of the Scale Plan to roughly \$33 per month, giving prospective customers a longer evaluation window than the 14-day free trial typically offered on the main pricing page.

Structure of the ClickFunnels \$99 for 3 Months Discount Offer

According to ClickFunnels support materials and independent deal summaries, the current promotion follows a consistent structure:

Eligibility: New customers only (those who have not previously held a ClickFunnels account under the same details).

Plan level: Access to Scale Plan features, which normally cost \$197 per month.

- Promotional price: \$99 total for the first 90 days.
- Standard cost for comparison: Three months of Scale at regular rates total \$591; the difference, \$591 – \$99 = \$492, reflects the headline saving over the period.

- After 90 days: The account renews at the standard Scale Plan rate (currently \$197 per month, plus applicable taxes), unless the user cancels.

The offer is distributed through specific promotional pages, PDFs, and partner links rather than the default pricing screen, meaning users typically access it via dedicated campaign URLs or affiliate content. Learn more at <https://getplatform.link/3months-clickfunnels>

What the ClickFunnels Scale Plan Includes Under the Discounted Offer

The Scale Plan is ClickFunnels' mid-tier subscription, positioned between Launch and Optimize. Official documentation outlines the Scale Plan as including the following core allowances and features:

Price: \$197 monthly or \$1,970 annually (≈\$164 per month on annual billing).

Unlimited funnels (currently listed as a limited-time provision).

5 workspaces for separating brands or projects.

5 team members with access to the account.

Up to 75,000 contacts in the internal CRM.

Up to 300,000 emails per month.

6 courses for digital products or memberships.

Unlimited custom domains.

Conversion boosters and countdown funnels features.

Priority + live chat support.

AI tools (commonly documented as up to 2 million words of AI assistance).

Custom code editor, webhooks, and full API access.

These capabilities are designed to support more established funnels and multi-project workflows compared with the Launch tier, which carries lower contact and email limits, fewer workspaces, and fewer courses.

Under the \$99 for 3 months discount, new users have access to these Scale Plan features at the reduced effective rate for 90 days, enabling them to design, launch, and refine funnels under the same technical conditions as regular Scale subscribers.

How the \$99 Discount Differs From Standard ClickFunnels Pricing and Trials

ClickFunnels maintains a standard pricing structure where:

- The Launch Plan is listed at \$97 per month.

- The Scale Plan is listed at \$197 per month.

- The Optimize Plan is listed at \$297 per month.

The Dominate Plan is billed annually at a higher enterprise-oriented rate.

Additionally, ClickFunnels typically offers a 14-day free trial for new signups, and many public resources note the presence of a 30-day money-back guarantee, effectively combining to give users up to roughly 44 days to evaluate the software on standard terms.

The ClickFunnels Discount \$99 for 3 Months differs in several key ways:

Duration

Extends discounted access to 90 days, rather than a two-week trial window.

Plan Level

Directly applies to the Scale Plan, rather than limiting users to a basic or restricted trial tier.

Pricing structure

Replaces monthly charges during the first three months with a single \$99 payment, then reverts to standard monthly billing if the subscription continues.

Savings magnitude

Based on current Scale pricing, the promotion reduces the cost of the first three months from \$591 to \$99, a difference of \$492 or roughly 83% off.

These characteristics make the \$99 offer function more as an extended evaluation period at reduced cost rather than a conventional trial, while still aligning with the underlying subscription model once the promotional window ends. Learn more at <https://getplatform.link/3months-clickfunnels>

Typical Use Cases for the \$99 ClickFunnels Promotion

From public reviews and analyses of the promotion, several recurring use cases emerge among those considering the ClickFunnels \$99 for 3 Months offer:

1. First-Time Funnel Builders

Entrepreneurs and small businesses planning to build their first sales funnel, webinar registration flow, or product launch page often use the 90-day discount to:

Create landing pages, email sequences, and order forms in a single system.

Compare funnel performance against existing website pages or other tools.

Determine whether the platform's design tools and templates align with their team's workflow.

2. Agencies Testing a Shared Infrastructure

Marketing agencies exploring whether to standardize on ClickFunnels for client work may:

Use Scale's 5 workspaces to separate a small number of client projects.

Test how permissions, domains, and reporting behave across multiple brands.

Evaluate whether the balance of flexibility and structure matches agency processes.

3. Course Creators and Membership Programs

Educators and course creators considering a transition to ClickFunnels may use the promotional period to:

Build up to six courses under the Scale allowance.

Integrate funnels, email follow-up, and membership access rather than using separate systems.

Observe student sign-up flows and onboarding sequences within the platform.

4. Businesses Consolidating Multiple Tools

Organizations using separate services for:

Landing pages

Email marketing

CRM

Basic e-commerce or checkout

may employ the 90-day discount as a trial of a more consolidated approach, comparing not only subscription costs but also operational complexity, reporting visibility, and handoff between teams.

The promotional pricing itself does not guarantee improved results, but it can reduce the incremental cost of running these comparisons over a longer period.

Eligibility, Renewal, and Refund Considerations

ClickFunnels' own promotional PDF and several independent guides emphasize a small set of practical conditions tied to the \$99 for 3 Months offer:

New customers only:

The discount is intended for first-time customers and is not generally available to returning users or those who have previously held ClickFunnels subscriptions under the same account information.

Duration and billing:

Users pay \$99 once, which covers 90 days of Scale Plan access. At the end of this period, if the subscription remains active, the account renews at the regular \$197/month rate.

Cancellation options:

Customers who do not wish to continue beyond the promotional period are typically able to cancel from within their dashboard or by contacting ClickFunnels support prior to the next billing date.

Refund policy:

ClickFunnels' documentation and support pages indicate a 30-day money-back guarantee on

subscription charges, allowing users to request a refund within 30 days of a qualifying purchase if the product does not meet expectations.

Taken together, these terms give new customers multiple decision points: during the 90-day promotional window, in the first 30 days of paid access, and again before renewal at the standard Scale price.

How This Offer Fits Into the Broader Funnel Software Market

The ClickFunnels Scale Plan, with its emphasis on funnel building, CRM capacity, email allowances, and bundled course hosting, sits within a crowded ecosystem of tools that aim to centralize online sales infrastructure. Competing platforms and alternatives may emphasize different strengths, such as:

Standalone landing page builders and A/B testing tools

All-in-one course platforms or membership sites

CRM-first platforms with integrated marketing automation

Recent comparisons note that ClickFunnels' Scale tier focuses on:

- Learning Revolution
- Unlimited funnels and pages (under current promotional allowances)
- Elevated contact and email limits for growing lists
- Centralized hosting of funnels, basic websites, courses, and email in one system

The \$99 for 3 months discount does not change these structural features but temporarily adjusts the cost of evaluating whether they align with an organization's preferred approach.

Practical Questions for Businesses Considering the \$99 Discount

Before adopting the ClickFunnels Discount \$99 for 3 Months, businesses and agencies commonly reflect on a few operational questions:

What funnel or campaign will be built first?

Having a specific use case in mind (e.g., a lead magnet funnel, a product launch sequence, or a webinar registration flow) can clarify whether the 90-day window is sufficient for design, traffic, and iteration.

How will results be measured?

Metrics such as opt-in rates, sales conversions, average order value, and show-up rates to booked calls can help evaluate whether ClickFunnels produces comparable or improved outcomes relative to existing tools.

What is the post-promotion plan?

If the platform performs well, organizations need to assess whether the \$197/month Scale pricing is sustainable longer term, or whether a different tier (such as Launch) or a competing tool might be more appropriate.

How will ClickFunnels interact with the current stack?

Integration needs—such as payment processors, webinar tools, or external CRMs—should be reviewed to avoid surprises during implementation.

Addressing these points in advance can help make the most of the 90-day period while keeping long-term considerations in view.
