

Certify360.ai Launches Android App to Deliver AI-Powered Certification Exam Prep On-the-Go

AI-powered platform Certify360.ai with new App offers personalized study plans, real-time analytics, and mock exams to revolutionize certification exam prep

SAN FRANCISCO, CA, UNITED STATES, December 5, 2025 /EINPresswire.com/ -- [Certify360.ai](https://www.certify360.ai), the AI-driven learning platform transforming how professionals prepare for certifications, today announces the launch of its Android app, bringing personalized, data-driven exam preparation to mobile devices. Available now on the Google Play Store, the app extends Certify360.ai's offerings, enabling learners to study whenever and wherever.

An Exam Prep Platform, Now in Your Pocket

Originally launched as a web-based AI platform in March 2025, Certify360.ai has been helping students, professionals, and corporate training teams prepare more effectively for certification exams. The platform uses machine learning to identify knowledge gaps, generate personalized study plans, provide expert-curated content, offer timed mock exams, and deliver real-time performance analytics.

With the new Android app, all those capabilities are now optimized for mobile use. Key mobile features include:

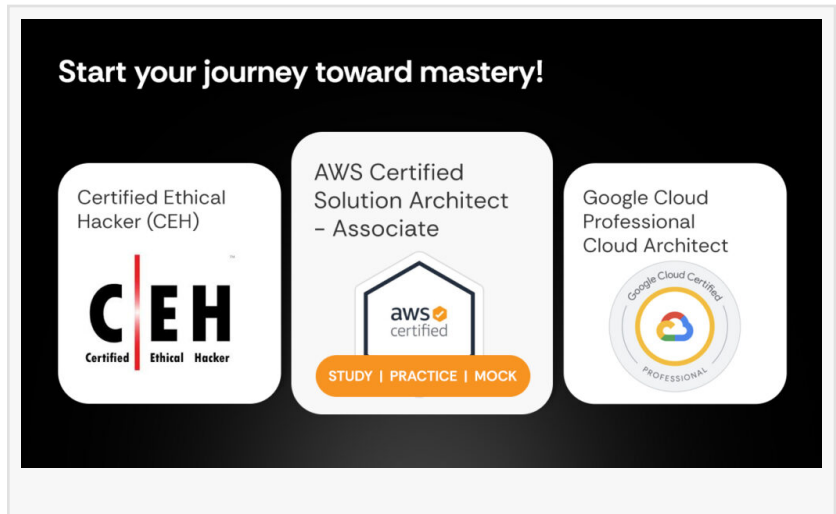

Adaptive Learning Paths On-the-Go: The app analyzes individual strengths and weaknesses and produces customized study plans, just like the web version.

Practice & Mock Exams Anywhere:
Users can take topic-based quizzes or full, timed mock exams from their Android devices.

High-Quality, Curated Study Content:
Video tutorials, expert articles, whitepapers, interactive modules—all aligned with certification syllabi.

Progress Tracking & Motivation:
Detailed performance reports, badges, milestones, and community features to keep learners engaged.

***Why the Android Launch Matters ***

Learners told us they wanted the full Certify360.ai experience on the go. With our Android app, we're making preparation more accessible and more aligned with how people live their lives today."

Raju Shreewastava, CEO of Certify360.ai

In today's fast-moving professional world, many learners need flexibility. By introducing the Android app, Certify360.ai ensures:

Accessibility: For learners without regular desktop / laptop access, or those who travel frequently.

Convenience: Study breaks, commutes, or any spare moments can be used productively.

Consistency: Seamless syncing across devices—progress on mobile reflects on web platform and vice versa.

***What's Next & Vision ***

Certify360.ai continues its mission to redefine exam preparation through AI. The Android release is the latest step in expanding access. Future updates are expected to include offline study options, push notifications for study reminders, enriched analytics dashboards, and support for more certification tracks.

***Availability ***

The Certify360 Android app is available today on the Google Play Store. Visit the following link to download:

Download Certify360 on Google Play Google Play

<https://play.google.com/store/apps/details?id=com.certify360.ai>

The app is suitable for those preparing for IT certifications (AWS, Cisco, Microsoft, CompTIA, etc.), business credentials (PMP, Six Sigma), healthcare exams, and more.
