

# Site Remediation Consulting Services Market Trends 2025-2029: Regional Outlook and Sizing Analysis

The Business Research Company's Site Remediation Consulting Services Global Market Report 2025 – Market Size, Trends, And Global Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, December 8, 2025 /EINPresswire.com/ -- Site Remediation Consulting Services Market Growth Forecast: What To Expect By 2025?

In recent times, the <u>market size for site remediation consulting services</u> has witnessed a consistent increase. The market, which is poised to rise from \$14.35 billion in 2024 to \$14.84 billion in 2025, is projected to have a compound annual growth rate (CAGR) of 3.4%. This growth

The Business Research Company's Latest Report Explores Market Driver, Trends, Regional Insights -Market Sizing & Forecasts Through 2034"

The Business Research
Company

over the historical period is due to factors like environmental legislations, expansion in the industrial sector, legal accountabilities and adherence to regulations, corporate duty, as well as involvement of community and stakeholders.

It is anticipated that the market size for site remediation consulting services will exhibit consistent growth in the upcoming years, reaching a sizable value of \$17.74 billion in 2029 by expanding at a compound annual growth rate (CAGR) of 4.6%. This growth expected in the forecasted

period can be credited to approaches such as sustainable remediation practices, urban redevelopment schemes, government-driven initiatives, brownfield revitalization, data analytics, and site characterization. Moreover, the increasing trend of engaging with green technologies, involving the community, incorporating remediation in real property development, employing advanced monitoring technologies, and strategizing recovery and reuse will be prominent in the forecast period.

What Are Key Factors Driving The Demand In The Global Site Remediation Consulting Services Market?

The soaring levels of air and water contamination in the past decade, coupled with a surge in natural disasters like floods, earthquakes, and landslides have amplified the need for site remediation consulting services worldwide. Natural disasters such as tsunamis, hurricanes, and earthquakes have expanded the opportunities for ecological restoration and site remediation consulting services. In April 2024, the Department for Environment, Food, and Rural Affairs, a UK government body tasked with environmental protection and improvement, reported that urban background ozone (O3) concentrations touched 66.8 µg/m3 in 2023, an increase of 3% from the previous year. Moreover, the Environment Agency, another UK government department, reported 2,026 incidents related to water pollution in July 2023, a rise from 1,883 incidents in 2021. Hence, the steep increase in air and water contamination is propelling the demand for the site remediation consulting services market.

Who Are The Leading Players In The Site Remediation Consulting Services Market? Major players in the Site Remediation Consulting Services include:

- Tetra Tech Inc
- Environmental Resources Management
- AECOM Technical Services Inc.
- CH2M Hill Companies Inc.
- Arcadis U.S. Inc.
- Clean Harbors Environmental Services Inc.
- Veolia ES Solid Waste Inc.
- Golder Associates Inc.
- Wood Environment & Infrastructure Solutions Inc.
- Jacobs Engineering Group Inc.

What Are The Key Trends Shaping The Site Remediation Consulting Services Industry? The site remediation consulting services market is being dynamically shaped through strategic alliances by key industry players, as exemplified by Pedro Resources Ltd.'s partnership with Fixed Earth Innovations Ltd. The goal of this collaboration is to enhance offerings for their existing clientele through the innovation of new biotech solutions aimed at rehabilitating polluted areas. For example, in July 2023, Pedro Resources Ltd, a Canadian enterprise specializing in environmental and remediation services, unveiled their cooperation with Fixed Earth Innovations Ltd. Pedro and FEI pledged to jointly explore and implement biotechnological approaches to tidying up pollution caused by resource extraction activities, such as mining. As part of this agreement, FEI will embark on the production of heat-resistant microbes, metal remediation microorganisms, tetrachloroethylene (also referred as PERCs or PCEs), and poly and perfluoroalkyl substances (PFAS, colloquially referred to as forever chemicals). Fixed Earth Innovations Ltd operates as a private biotech corporation in the US, with a specific focus on

finding, assessing, and applying microorganisms for remediation processes.

Analysis Of Major Segments Driving The Site Remediation Consulting Services Market Growth The site remediation consulting services market covered in this report is segmented –

- 1) By Type: Bioremediation, Pump And treat, In situ vitrification, Thermal treatment, Chemical treatment, Excavation, Soil washing, Other Types
- 2) By Service: Remediation Services, Soil Remediation Services, Water Remediation Services
- 3) By Application: Waste disposal sites, Oil And gas, Mining, Chemical And Petrochemical, Manufacturing, Agriculture, Construction, Other Applications

## Subsegments:

- 1) By Bioremediation: Microbial Bioremediation, Phytoremediation, Bioventing
- 2) By Pump & Treat: Groundwater Extraction Systems, Treatment Technologies (Air Stripping, Carbon Adsorption)
- 3) By In Situ Vitrification: Electrical Resistance Heating, Plasma Arc Technology
- 4) By Thermal Treatment: Soil Vapor Extraction, Thermal Desorption
- 5) By Chemical Treatment: Chemical Oxidation, Stabilization/Solidification
- 6) By Excavation: Excavation and Disposal, Onsite Treatment
- 7) By Soil Washing: Physical Soil Washing, Chemical-enhanced Soil Washing
- 8) By Other Types: Electrokinetic Remediation, Permeable Reactive Barriers, Monitored Natural Attenuation (MNA)
