

DevSecOps Solution Shapes USA Tech Strategy as Companies Tackle Evolving Cyber Threats

DevSecOps solution adoption is rising across the USA as organizations tackle complex cyber risks and accelerate digital transformation with secure automation.

MIAMI, FL, UNITED STATES, December 8, 2025 /EINPresswire.com/ -- In today's fast-paced digital era, the demand for swift software delivery is more critical than ever. However, rapid development cycles often bring significant security risks for organizations. [DevSecOps solutions](#) are reshaping software development by embedding security into every stage of the process—from planning and coding to testing and deployment. This integrated model ensures that security is proactive rather than reactive, helping organizations avoid costly vulnerabilities and reputational damage. As organizations elevate their defensive posture, adopting a DevSecOps Solution has become essential to maintaining secure and resilient development cycles.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

Acknowledging the urgent need for secure and agile development practices, IBN Tech is pioneering DevSecOps adoption to elevate its software delivery processes. By unifying development, security, and operations teams under a coordinated framework, IBN Tech promotes innovation without compromising security. This strategic shift strengthens the company's technological capabilities and reinforces its dedication to delivering reliable and secure solutions in an increasingly complex digital world. This is further supported by IBN Tech's focus on integrating its customized DevSecOps Solution into every stage of the development lifecycle.

Industry Challenges Demanding Immediate Strategic Response

Software development today faces acute security issues that legacy methods fail to mitigate:

- Disconnected security tool stacks leading to silos and blind spots
- Compliance handled manually, slowing releases and increasing audit exposure
- Developer pushback against security gates perceived as workflow blockers
- Lack of DevSecOps expertise leaving teams under-resourced
- Challenges in implementing Infrastructure as Code scanning and Static Application Security Testing into current CI/CD pipelines

IBN Tech's Comprehensive DevSecOps Offering:

IBN Tech provides a wide-ranging set of DevSecOps services designed to embed security across development workflows, solving common issues related to visibility, compliance, and developer experience. As part of its enhanced DevSecOps Solution, IBN Tech ensures that every security control is seamlessly integrated and automated.

- DevSecOps Roadmap & Assessment: A maturity scan evaluates cultural adoption, tooling gaps, and pipeline weaknesses, delivering a guided roadmap for both quick wins and long-range enhancements.
- Security-Embedded CI/CD: Core security tools—SAST, SCA, and DAST (Snyk, SonarQube, Fortify)—are implemented within CI/CD pipelines to automate vulnerability checks and maintain compliance.
- Cloud-First Secure DevOps Pipelines: AWS and Azure environments benefit from policy-as-code controls that eliminate misconfigurations and uphold consistent, secure operating standards.
- Developer Security Improvement: Secure coding rules, focused training, and organized triage channels strengthen developer capabilities with clear, actionable vulnerability information.

The graphic features the IBN logo at the top left. To its right is a green lightbulb icon with a checkmark inside. The text 'CLOUD SECURITY TIP' is prominently displayed in the center. Below this, the title '3 Ways to Protect Data While Moving to the Cloud' is shown. Three bullet points with green checkmark icons follow: 'Encrypt Everything', 'Strong Access Controls', and 'Regular VAPT Testing'. On the right side, there is a blue cloud icon with a padlock and a checkmark. In the top right corner, three ISO standards are listed: ISO 9001:2015, ISO 20000-1:2018, and ISO 27001:2022. At the bottom, a green banner contains the text 'Secure your cloud with our expert Cloud Migration services'. Below this banner, a dark blue bar displays the email 'sales@ibntech.com' and the website 'www.ibntech.com'. The entire graphic is set against a light blue background with a network diagram pattern.

CLOUD SECURITY TIP

3 Ways to **Protect Data** While Moving to the **Cloud**

- ✓ **Encrypt Everything** – Protect data in transit and at rest to keep it safe even if intercepted
- ✓ **Strong Access Controls** – Use IAM and MFA to ensure only the right people have access.
- ✓ **Regular VAPT Testing** – Detect misconfigurations and vulnerabilities before attackers exploit them.

Secure your cloud with our expert **Cloud Migration services**

DevSecOps as a Service

□ Compliance & Governance Automation: Automated evidence captures simplify adherence to SOC 2, ISO 27001, GDPR, HIPAA, and other regulatory frameworks, easing audit demands and operational pressure.

Client Success: Delivering Software Faster and More Securely

DevSecOps services have empowered organizations to accelerate software output while improving security protections at every point in the development lifecycle. These advances stem largely from the implementation of a scalable and automated DevSecOps Solution tailored to organizational needs.

- A leading firm in financial services revamped its development pipeline by adopting automated security evaluations, continuous oversight, and compliance verification directly within its CI/CD operations.
- The organization achieved a 40% reduction in critical vulnerabilities during early development, a 30% drop in release cycle duration, and gave teams the ability to innovate without diminishing security standards.

A Future-Ready Approach to Security and Digital Velocity

In an era where software delivery cycles are accelerating, enterprises must adopt security practices that ensure both agility and compliance. MRFR forecasts that the DevSecOps market—worth \$6.59 billion in 2022—will expand to \$23.5 billion by 2032, demonstrating widespread recognition of security's central role in digital initiatives. This upward trajectory increases the urgency for businesses to invest in a proven DevSecOps Solution that strengthens resilience and promotes scalable digital growth.

This momentum stems from exponential cloud adoption, growing cyber risk, and automation requirements across multiple verticals such as IT, telecommunications, healthcare, government, and retail. With its developer-centric DevSecOps platform, IBN Technologies helps enterprises achieve these goals by enabling seamless security integration, automated compliance checks, and faster delivery of secure, production-level code.

IBN Technologies combines Policy as Code, SAST, IaC scanning, and automated audit evidence generation to help clients reduce risk, strengthen compliance posture, and operate with greater agility. In a landscape where continuous delivery meets constant cyber exposure, delaying security is no longer feasible. Partnering with IBN Technologies equips businesses with a forward-looking DevSecOps Solution that enhances operational efficiency and enables long-term competitive differentiation.

About IBN Technologies

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.
