DevSecOps Consulting Empowers U.S. Companies in 2025 to Accelerate Secure Digital Transformation

IBN Technologies' DevSecOps Consulting helps U.S. firms embed security into CI/CD pipelines, ensure compliance, and accelerate secure software delivery.

MIAMI, FL, UNITED STATES, December 8, 2025 /EINPresswire.com/ -- The demand for DevSecOps accessing is rising sharply as organizations navigate growing cyber threats, tighter compliance mandates, and the shift to cloud-native and modern software architectures. Companies increasingly seek DevSecOps consulting expertise to embed security within development workflows, maintain regulatory adherence, and prevent data breaches. Many lack the in-house skills to execute these complex practices effectively, making external DevSecOps consulting vital. These solutions allow teams to accelerate software delivery without compromising security, ensuring a balance between speed and risk management.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

As enterprises advance their digital transformation initiatives, the importance of integrated, proactive security intensifies. IBN Technologies supports organizations in detecting vulnerabilities early, automating security controls, and sustaining continuous compliance across CI/CD workflows. By combining professional DevSecOps consulting with advanced monitoring and process automation, businesses can reduce operational overhead, lower security risks, and improve software stability. This integrated approach enables organizations to innovate with confidence while preserving trust, efficiency, and resilience in their digital ecosystems.

Detect vulnerabilities early and ensure compliance across your workflows.

DevSecOps Risk Exposure

As organizations accelerate digital transformation, security challenges have become increasingly complex. Many teams fail to integrate robust security measures early in development pipelines, struggle with compliance, and face difficulties protecting dynamic cloud and microservices environments. Lack of automation and specialized expertise increases operational risk, while cyber attackers exploit weaknesses. Implementing proactive DevSecOps consulting practices with automation and monitoring is critical to safeguard sensitive data and ensure reliable software delivery.

CLOUD SECURITY TIP

3 Ways to **Protect Data** While Moving to the **Cloud**

- ☑ **Encrypt Everything** – Protect data in transit and at rest to keep it safe even if intercepted
- ☑ **Strong Access Controls** – Use IAM and MFA to ensure only the right people have access.
- ☑ **Regular VAPT Testing** – Detect misconfigurations and vulnerabilities before attackers exploit them.

DevSecOps as a Service

• Weak pipeline security creates reactive protection measures.
• Limited internal expertise hampers DevSecOps adoption.
• Regulatory compliance demands increase operational pressure.
• Securing distributed cloud and microservices systems is difficult.
• Manual workflows lead to errors and slower deployment.
• Persistent cyber threats exploit security blind spots.

Key Services Offered by the IBN Tech DevSecOps Platform:

IBN Tech's DevSecOps consulting services integrate security seamlessly into development, helping organizations tackle widespread pipeline, tooling, and compliance challenges:

 DevSecOps Assessment & Roadmap: Conducts a detailed maturity assessment to identify gaps in tools, team culture, and CI/CD processes, delivering a structured roadmap for immediate action and long-term growth.
 Secure CI/CD Integration: Embeds SAST, SCA, and DAST security tools into CI/CD pipelines (e.g., SonarQube, Fortify, Snyk), automating vulnerability scans and compliance enforcement within development workflows.
 Secure Cloud DevOps Pipelines: Strengthens AWS and Azure environments by applying policy-as-code frameworks to eliminate misconfigurations and ensure consistently secure operations.

Secure Code Practices & Developer Enablement: Provides developers with secure coding guidelines, targeted training, and vulnerability triage processes that generate actionable security insights.
 Governance, Compliance & Reporting: Automates collection of audit evidence, supporting SOC 2, ISO 27001, GDPR, HIPAA, and other regulatory frameworks, reducing audit time and overhead.

Client Success: Secure Development, Faster Delivery

DevSecOps consulting services enable organizations to deliver software faster while ensuring security is embedded throughout the development lifecycle.

• A prominent financial services company optimized its development pipeline by integrating automated vulnerability testing, continuous monitoring, and compliance checks directly into CI/CD workflows.

• This approach cut critical vulnerabilities by 40% in early stages, accelerated release timelines by 30%, and allowed development teams to innovate confidently without compromising security.

Agile Growth Through DevSecOps Innovation

In today's fast-moving digital landscape, embedding comprehensive security into software development is no longer optional. MRFR reports that the DevSecOps consulting market, valued at $6.59 billion in 2022, is projected to reach $23.5 billion by 2032, highlighting the growing need for organizations to integrate security and compliance seamlessly into their development workflows.

By implementing proactive DevSecOps consulting frameworks—combining automated security assessments, secure cloud management, and developer enablement—organizations can protect against emerging cyber threats while maintaining fast innovation cycles. Research shows that such approaches lead to faster software releases, improved reliability, and significant vulnerability reduction. Integrating continuous monitoring, automated compliance checks, and security-driven CI/CD workflows enables companies to expand software capabilities while preserving operational resilience and stakeholder confidence in increasingly complex environments.

About IBN Technologies

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions
