

DevSecOps Consulting Helps U.S. Firms Accelerate Secure Software Delivery

IBN Technologies' DevSecOps consulting helps U.S. companies accelerate secure software delivery, strengthen cloud security, and maintain compliance.

MIAMI, FL, UNITED STATES, December 8, 2025 /EINPresswire.com/ -- The market for DevSecOps continues to expand rapidly as organizations confront growing cyber risks, evolving regulatory requirements, and the migration to cloud-centric and modern software architectures. Companies are increasingly relying on [DevSecOps consulting](#) services to incorporate security directly into development processes, achieve compliance, and reduce the risk of breaches. The lack of internal expertise in implementing these complex security practices makes external guidance indispensable. By embedding security throughout the development lifecycle, organizations can deliver software efficiently while maintaining comprehensive protection.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

With the pace of digital transformation accelerating, the need for integrated and proactive security solutions has never been greater. IBN Technologies enables businesses to identify vulnerabilities early, automate security workflows, and uphold continuous compliance across CI/CD environments. By integrating expert DevSecOps consulting with process automation and monitoring, companies can mitigate operational risk, reduce costs, and improve overall software quality. This approach equips organizations to innovate confidently while ensuring trust, efficiency, and secure operations across their digital infrastructure.

Optimize CI/CD processes while maintaining robust protection and efficiency

Operational and Security Weaknesses

Organizations today face mounting challenges in securing fast-moving software development processes. Embedding security into development pipelines, maintaining compliance, and protecting distributed cloud systems remain major hurdles. Lack of skilled personnel and reliance on manual processes slow progress and increase error rates. At the same time, advanced cyber threats continuously exploit vulnerabilities. Integrating DevSecOps consulting early, with automation and continuous monitoring, is crucial for maintaining software reliability and operational confidence.

- Insufficient security in development pipelines causes reactive defenses.
- In-house DevSecOps capability gaps delay implementation.
- Compliance requirements create constant operational pressure.
- Securing multi-cloud and microservices environments is challenging.
- Manual workflows slow development and increase errors.
- Evolving cyber threats take advantage of security gaps.

Key Services Offered by the IBN Tech DevSecOps Platform:

IBN Tech delivers end-to-end DevSecOps consulting services, embedding security into development cycles to solve critical operational, tooling, and compliance challenges:

- DevSecOps Assessment & Roadmap: Conducts a maturity scan that highlights gaps in pipelines, tools, and organizational culture, producing a clear roadmap for short-term fixes and long-term strategic planning.
- Secure CI/CD Integration: Integrates SAST, SCA, and DAST tools into CI/CD workflows (SonarQube, Fortify, Snyk), automating security scans and maintaining compliance seamlessly across pipelines.
- Secure Cloud DevOps Pipelines: Protects AWS and Azure cloud environments through policy-

The graphic features the IBN logo at the top left. To the right, it lists ISO certifications: ISO 9001:2015, ISO 20000-1:2018, and ISO 27001:2022. Below the logo is a lightbulb icon with a checkmark inside, followed by the text 'CLOUD SECURITY TIP'. To the right of this is a blue cloud icon with a padlock and a checkmark. The main heading reads '3 Ways to Protect Data While Moving to the Cloud'. Below this are three bullet points, each with a green checkmark icon: 'Encrypt Everything - Protect data in transit and at rest to keep it safe even if intercepted', 'Strong Access Controls - Use IAM and MFA to ensure only the right people have access.', and 'Regular VAPT Testing - Detect misconfigurations and vulnerabilities before attackers exploit them.' A green banner at the bottom of the main content area says 'Secure your cloud with our expert Cloud Migration services'. At the very bottom, a dark blue bar contains the email 'sales@ibntech.com' and the website 'www.ibntech.com', followed by the text 'DevSecOps as a Service'.

CLOUD SECURITY TIP

3 Ways to Protect Data While Moving to the Cloud

- ✓ **Encrypt Everything** – Protect data in transit and at rest to keep it safe even if intercepted
- ✓ **Strong Access Controls** – Use IAM and MFA to ensure only the right people have access.
- ✓ **Regular VAPT Testing** – Detect misconfigurations and vulnerabilities before attackers exploit them.

DevSecOps as a Service

as-code approaches, eliminating misconfigurations and ensuring secure, reliable operations.

□ Secure Code Practices & Developer Enablement: Provides developers with secure coding standards, targeted workshops, and triage workflows that deliver actionable guidance for vulnerability remediation.

□ Governance, Compliance & Reporting: Automates evidence collection to meet SOC 2, ISO 27001, GDPR, HIPAA, and other compliance requirements, reducing audit workload and ensuring regulatory adherence.

Client Success: Secure Development, Faster Delivery

With DevSecOps consulting services, organizations can accelerate software development while embedding comprehensive security across all stages of the lifecycle.

- A leading financial services company revamped its CI/CD workflow by integrating automated security tests, continuous monitoring, and compliance checks seamlessly into development pipelines.

- This transformation led to a 40% decrease in critical vulnerabilities during initial development phases, 30% shorter release cycles, and teams were able to innovate rapidly without compromising security.

Transforming Software Delivery with DevSecOps

With digital transformation accelerating, organizations must integrate comprehensive security processes to deliver software that is both agile and compliant. MRFR estimates the DevSecOps consulting market at \$6.59 billion in 2022, with growth expected to reach \$23.5 billion by 2032, reflecting the urgent need for security and compliance across software development pipelines.

Organizations leveraging proactive DevSecOps consulting strategies—combining automated security controls, secure cloud operations, and developer enablement—can stay ahead of cyber threats while enabling rapid innovation. Industry analyses reveal that these frameworks improve release speed, enhance software reliability, and reduce vulnerabilities. Embedding continuous monitoring, automated compliance, and structured security workflows within CI/CD pipelines allows businesses to expand software capabilities confidently, maintaining resilience, trust, and operational excellence in increasingly complex digital environments.

About IBN Technologies

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.
