2025 – Market Size, Trends, And Forecast
2025-2034*

LONDON, GREATER LONDON, UNITED
KINGDOM, December 10, 2025

/EINPresswire.com/ -- What Is The
Expected Cagr For The [Gynecology
Drugs Market](#) Through 2025?

The market size for gynecology drugs has seen consistent growth in recent years. It's projected to swell from \$43.27 billion in 2024 to \$45.06 billion in 2025, representing a compound annual growth rate (CAGR) of 4.1%. Factors contributing to the growth in the historic phase include an increase in the launch of drugs with new mechanisms, enhanced educational tools and enlightenment on menopause, a surge in the use of long-acting reversible contraceptives, lifestyle transformations, expanding healthcare knowledge and expenditure, government endeavours and amplified expenditure in pharmaceutical research and development.

Expectations are high for substantial growth in the gynecology drugs market in the coming years, with predictions of a surge to \$55.74 billion in 2029 at a compound annual growth rate (CAGR) of 5.5%. This anticipated growth during the forecast period is due to factors such as an increased public awareness and usage of contraceptives and hormone replacement therapy (HRT), an age-related upswing in gynecological cancers, amplified incidence of ovarian cancer, the prevalence of gynecological diseases, an uptick in healthcare spending, and sizable investments geared towards understanding and treating endometriosis. Forecasted trends for this period include the recommendation that corporations contemplate new treatments for patients with oncological conditions and endometriosis to potentially increase survival rates, emphasis on the development of novel menopausal hormone therapy for improved treatment options, deeper investments in gynecology drug research to forge innovative opportunities for drug development, elevating awareness of the benefits of contraceptives, and introducing new products in the market to cater to unaddressed demands in both developing and developed countries. Additionally, development of antibody-drug conjugates (ADCs) to target ovarian cancers, strategic collaborations, and partnerships aimed at expanding product portfolios, boosting revenue, and establishing category leadership are encouraged. There is also a strong

What Are The Key Factors Driving Growth In The Gynecology Drugs Market?

The global gynecological drugs market is expected to experience growth driven by a surge in ovarian cancer cases among females. Ovarian cancer starts in the female reproductive system's ovaries, and gynecological pharmaceuticals play a crucial role in its management. They present precisely targeted and potent treatment methods that enhance survival probabilities and raise patients' life quality. According to Globocan forecasts, ovarian cancer's worldwide occurrence is projected to climb to 434,184 by 2040. In the prediction period, the rising prevalence of ovarian cancer will likely spur the demand for gynecological drugs.

What Are The Top Players Operating In The Gynecology Drugs Market?

Major players in the Gynecology Drugs include:

- Merck & Co. Inc.
- AbbVie
- Hoffmann-La Roche Ltd.
- GlaxoSmithKline Plc
- Pfizer Inc.
- Ferring Holding SA
- TherapeuticsMD Inc.
- Lupin Pharmaceuticals Inc.
- Johnson & Johnson
- Eli Lilly and Company

What Are The Major Trends That Will Shape The Gynecology Drugs Market In The Future?

Leading firms in the gynecology drug market are focusing on the creation of novel treatments like hormone replacement therapy in order to maintain a competitive advantage. Hormone Replacement Therapy (HRT) is a medical process that involves the use of hormones to alleviate menopause-related symptoms such as mood swings, night sweats, hot flashes, and vaginal dryness, thus improving the overall well-being of women going through these changes. In April 2023, for example, the Department of Health and Social Care, a UK government body, in partnership with NHS England and the NHS Business Services Authority, another UK-based non-departmental public body, introduced a new Hormone Replacement Therapy (HRT) prescription prepayment certificate (PPC). This new HRT PPC allows women in England to receive HRT for just £19.30 per annum (around \$24.50 USD), thereby notably reducing the financial strain of managing menopausal symptoms.

Comprehensive Segment-Wise Insights Into The Gynecology Drugs Market

The gynecology drugs market covered in this report is segmented –

- 1) By Therapeutics: Hormonal Therapy, Non-Hormonal Therapy
- 2) By Indication: Gynecology Cancers, Menopausal Disorder, Polycystic Ovary Syndrome, Contraception, Other Indications
- 3) By Distribution Channel: Hospital Pharmacies, Retail Pharmacies, Online Pharmacies

Subsegments:

- 1) By Hormonal Therapy: Estrogen Replacement Therapy, Progesterone Therapy, Combination Hormonal Therapy
- 2) By Non-Hormonal Therapy: Antidepressants (For menopausal symptoms), Non-Hormonal Anticonvulsants, Herbal And Dietary Supplements
