Covid-19 Scenario:

□ Due to the outbreak of the COVID-19 pandemic, the market witnessed a slight downfall in 2020. This is attributed to the implementation of lockdowns by governments in a majority of countries globally and the shutdown of travel across the world to prevent the transmission of the virus.

□ The COVID-19 outbreak significantly impacted the global behavior analytics market, as it propelled the requirements for behavior-based technologies like voice recognition & gait analysis, that offer accurate solutions to identify people, both in-person & online, while resisting the spread of the virus.

□ Furthermore, amidst the pandemic, the demand for behavioral analytics solutions widely progressed across the healthcare sector, too. It gave the market a significant boost and also showed signs of growth.
