

Aurora Payments and 2S LimouSOLUTION Partner to Deliver Embedded Payments Across Global Transportation Platforms

The integration of Aurora's ARISE platform into 2S's software suite brings seamless payments to chauffeured transportation operators worldwide.

TEMPE, AZ, UNITED STATES, December 10, 2025 /EINPresswire.com/ -- Aurora Payments, a full-service payment technology provider, today announced a strategic partnership with [2S LimouSOLUTION](#), a global leader in software for the chauffeured transportation industry. Through this integration, Aurora's embedded ARISE payment platform is now available across 2S's suite of solutions, including LimouSOLUTION, LimouWEB, and LimouERP.

The partnership enables transportation operators to process payments securely and efficiently within the same software they use for dispatch, booking, fleet management, and invoicing. With no need to rely on external terminals or separate systems, operators benefit from a fully unified platform that improves workflow and accelerates cash flow.

“

Transportation operators need tools that reduce complexity, not add to it.”

*Achim Sorge, CEO of 2S
LimouSOLUTION*

“2S LimouSOLUTION has a reputation for building flexible and scalable technology that meets the real-world needs of transportation operators,” said John Badovinac, SVP of Embedded Commerce at Aurora Payments. “By integrating

ARISE into their platform, we're helping 2S users simplify their operations and gain real-time visibility into their payment activity.”

The integration brings Aurora's full payments infrastructure into the 2S ecosystem, including PCI-compliant transaction security, instant settlement capabilities, and automated reconciliation. Operators also benefit from built-in fraud prevention tools and real-time reporting across every leg of their business, from booking to billing.

"Transportation operators need tools that reduce complexity, not add to it," said Achim Sorge, CEO of 2S LimouSOLUTION. "Integrating Aurora's [ARISE platform](#) allows us to remove payment friction across our ecosystem and help customers operate more efficiently."

This partnership marks a significant advancement in the global digital transformation of the ground transportation industry. It reflects a growing demand for software platforms that not only manage operations but also offer native, integrated payment capabilities.
