

Fraud.net Achieves ISO/IEC 27001:2022 Certification for Information Security

Fraud.net adheres to globally recognized standards for information security management.

NEW YORK, NY, UNITED STATES,
December 10, 2025 /
EINPresswire.com/ -- [Fraud.net](#) recently
achieved ISO/IEC 27001:2022

certification. This accreditation serves as independent confirmation that the company's Information Security Management System (ISMS) meets the highest industry standards for data protection and risk management.

ISO/IEC 27001 is the world's most recognized standard for information security management systems. By meeting these rigorous international requirements, Fraud.net ensures the confidentiality, integrity, and availability of the data entrusted to it. This certification validates the company's robust risk management processes and aligns its security measures with global best practices used in over 150 countries. It also adds to Fraud.net's growing list of industry certifications, regulatory compliances, and frameworks, including GDPR, PCI DSS, SOC 2, HIPAA, NIST 800-53, NTIS, and AWS Qualified Software.

Compliance with this international standard demonstrates to stakeholders and customers that Fraud.net is fully committed to managing information securely. Holding a certificate from an accredited conformity assessment body provides an additional layer of confidence, proving that the company prioritizes the safety of client data and complies with rigorous security principles.

"These certifications demonstrate the work we have done to protect our customers' data," said Rajeev Yadav, CISO at Fraud.net. "Security and privacy are fundamental to everything we do, and it's gratifying to have these certifications validate our approach," he continued.
