

# AsReader Launches ASR-M30S SLIM-Type Smartphone-Mounted RFID Reader/Writer

*ASR-M30S SLIM-Type RFID Reader/Writer by AsReader is 14% lighter, weighing just 2.65 oz and reads a distance of over 16 feet*

PORTLAND, OR, UNITED STATES,  
December 16, 2025 /

EINPresswire.com/ -- Anyone who has scanned barcodes or read RFID tags over an eight-hour shift knows that device weight and size play a major role in comfort and therefore, productivity. Enter [AsReader](#), a global leader in RFID and barcode scanning technology—whose name literally means “use your smartphone As a Reader.” The company’s latest innovation, the ASR-M30S SLIM-Type RFID Reader/Writer, is designed to deliver comfort, power, and performance in a sleeker form factor.

Japanese designers made the new reader lighter, more compact, and easier to handle throughout the workday by eliminating a built-in battery. Compared to the previous model ASR-030D, the SLIM-Type is 14%

lighter, weighing just 2.65 ounces (75 grams), while achieving a reading distance of more than 16 feet (almost five meters)—more than three times the range of most pocket-devices. The unit is powered by the smartphone which can be charged either via passthrough USB-C port or a mini-magnetic terminal, so there’s no need to remove the device from its case.

Vice President and COO Paul Whitney touts the new SLIM-Type device as AsReader’s flagship, as

standards with RFID have evolved to require more comfort for users. "This new device is in a class of its own, and we're seeing tremendous interest already. The North American version of the ASR-M30S SLIM-Type reads up to 5x the read distance of competitors' devices, which typically only read up to 4 feet."

The new ASR-M30S SLIM-Type makes switching between Android and iOS devices easy as it's compatible with both, made possible with a modular case. AsReader plans to launch four variants soon, supporting Google Pixel 8a/7a/6a, [Kyocera](#) Digno SX4 (Japan), iPhone 16e/16/15, and Samsung A25/A06 (coming in 2026).

The advertisement for the AsReader ASR-M30S SLIM-Type features a dark background with red accents. At the top, the 'AsReader' logo is in a stylized red font, followed by 'ASR-M30S' in white. The main headline 'Ultra lightweight + High Performance' is in large white text. Below it, a red banner reads 'Transforming the Workplace • Smartphone mounted RFID Reader/Writer'. The central image shows a smartphone with the device attached to its back. Callouts highlight key features: 'Featherweight! Weighs less than 3oz Total Weight 75g' (with '3oz' in large white text and '75g' in a red circle), 'Less than 1/2 inch thick (0.4" / 10mm)', and 'LOW-power-consumption meets HIGH-power Reading, at distances from 5 to 16 feet (1.5 to 5m)!\*'. A smaller image of the device is shown in the bottom right corner.

Technical call outs for ASR-M30S SLIM-Type Smartphone-Mounted RFID Reader/Writer
