

Sedric Named to RegTech 100 for Enterprise AI Compliance Agents Across Communications and Marketing

Sedric, the AI-powered compliance platform for regulated financial services firms, today announced its inclusion in the 2026 RegTech100.

NEW YORK, NY, UNITED STATES,
December 15, 2025 /

EINPresswire.com/ -- [Sedric](#), the AI-powered compliance platform for regulated financial services firms, today announced its inclusion in the 2026 RegTech100. The recognition reflects accelerating adoption of

[Sedric's AI agents](#), which now support compliance, marketing, and customer-facing teams by removing the operational friction traditionally created by manual review processes.

Sedric featured in the prestigious RegTech 100 2026

As communication and content volumes continue to grow, institutions are restructuring how compliance is executed. Sedric's dedicated-model architecture deploys AI agents that operate continuously across customer interactions and marketing workflows—identifying risks, recommending corrective actions, and enabling business units to move faster with confidence. This shift has transformed compliance from a bottleneck into an embedded operational capability. Sedric's 2025 platform analysis shows that organizations adopting Sedric expanded compliance oversight from manual sampling of less than 5% of communications to continuous review across all channels. The platform also identified that a significant share of compliance issues occurred in materials already approved by human review,

“

Recognition in the RegTech 100 underscores a fundamental shift in how communications and marketing compliance is being managed. Institutions want to grow without slowing down for compliance.”

Nir Laznik

underscoring the limitations of legacy workflows. Sedric's AI agents close this gap by providing real-time and pre-distribution guidance, as well as continuous post-distribution monitoring.

“Recognition in the [RegTech 100](#) underscores the fundamental shift underway,” said Nir Laznik, Sedric Co-founder & CEO. “Institutions want to grow without slowing down for compliance. Since the advent of GenAI, the volume and velocity of communications and marketing content have increased exponentially—stretching traditional compliance processes beyond their limits. Sedric’s AI agents give firms the oversight they need at the speed their business operates, enabling faster execution, fewer errors, and reliable governance across communications and marketing.”

Sedric provides a unified control layer for financial institutions, spanning real-time agent assist, automated pre-approval review, and continuous monitoring across internal and partner ecosystems. Each deployment includes a dedicated compliance model engineered around the institution’s regulatory requirements, product constraints, and operational workflows. This approach delivers higher detection precision, fewer false positives, and full interpretability at enterprise scale.

Sedric is rapidly expanding across banking, credit cards, fintech, lending, and collections, and is increasingly used as foundational infrastructure for organizations modernizing their compliance and operational frameworks.

ABOUT SEDRIC

Sedric is an AI-powered compliance platform that enables regulated financial services organizations to control risk across customer communications and marketing at scale. Sedric’s AI agents support real-time interactions, automate pre-approval workflows, and continuously monitor communications across operational, marketing, affiliate, and partner channels. Its dedicated-model architecture delivers higher precision, fewer false positives, and accelerated review cycles, enabling institutions to operate at growth speed while maintaining rigorous oversight.
