

Enlighten Clinical Solutions, a Clinical Trial Technology Provider, Completes SOC 2 Type II, HIPAA, and GDPR Audits

Independent audits validate Enlighten's security and privacy controls supporting sponsors, CROs, and life sciences organizations.

ATLANTA, GA, UNITED STATES, December 18, 2025 /EINPresswire.com/ -- [Enlighten Clinical](#)

“

These audits represent important milestones in our continued investment in security, privacy, and regulatory alignment for life sciences organizations.”

*Jim Harris, Founder & CEO,
Enlighten Clinical Solutions*

[Solutions](#) today announced the successful completion of multiple independent audits assessing the company's security and privacy control environment, including its SOC 2 Type II audit, a HIPAA Security & Breach Notification Rule audit, and a GDPR control design audit. These evaluations reinforce Enlighten's commitment to supporting the rigorous data protection standards expected by clinical research organizations, sponsors, and life sciences partners.

The SOC 2 Type II audit, completed in August 2025, assessed the operating effectiveness of the company's security controls across the audit period in accordance with the AICPA's Trust Services Criteria. Unlike point-in-time reviews, a Type II audit evaluates controls over an extended period, providing assurance of consistent and sustained operational performance.

Independent assessments of Enlighten's HIPAA and GDPR control frameworks further validated the design of the company's controls as of December 1, 2025.

“These audits represent important milestones in Enlighten's continued investment in security, privacy, and regulatory alignment,” said Jim Harris, Founder & CEO of Enlighten Clinical Solutions. “As clinical research organizations and sponsors place increasing emphasis on data protection, these independent evaluations demonstrate our dedication to meeting and exceeding the expectations of the life sciences industry.”

The audits included structured evaluations of infrastructure, access management, administrative safeguards, operational policies, and risk management processes. Enlighten will continue to advance its compliance initiatives as part of its long-term security roadmap.

About Enlighten Clinical Solutions

Enlighten Clinical Solutions provides secure, cloud-based clinical operations and data management technology for life sciences organizations. The company's integrated platform includes EDC, eTMF, and CTMS solutions, enabling research teams to streamline data capture, trial documentation, and operational oversight while upholding stringent security and privacy standards.
