

EACR Inc – Melville Reinforces Commitment to Responsible Battery Recycling for Commercial Clients

Streamlined battery recycling solutions help businesses reduce risk, improve compliance, and keep hazardous materials out of landfills

MELVILLE, NY, UNITED STATES, December 19, 2025 / EINPresswire.com/ -- EACR Inc – Melville today reaffirmed its commitment to providing responsible battery recycling services for commercial clients across Long Island and the greater New York region. As businesses increasingly rely on battery-powered technology—ranging from laptops and handheld devices to UPS systems and energy storage equipment—EACR Inc continues to help organizations manage end-of-life batteries safely, efficiently, and with sustainability in mind.

Long Island Battery Recycling

Batteries can present unique handling challenges due to fire risk, storage requirements, and evolving disposal rules. EACR Inc – Melville works with organizations to simplify battery recycling programs while supporting internal safety policies, operational continuity, and environmental objectives.

“Commercial clients want a battery recycling partner that understands the operational and safety realities of handling used batteries,” said a spokesperson for EACR Inc – Melville. “Our focus is responsible battery recycling that’s organized, dependable, and aligned with what businesses need—whether they’re collecting a few containers per month or managing a larger multi-site program.”

Responsible Battery Recycling Built for Business Operations

EACR Inc – Melville supports commercial and institutional battery recycling needs with services

designed to reduce burden and risk, including:

Business-friendly pickup coordination for offices, warehouses, campuses, and multi-location organizations

Responsible end-of-life management for commonly generated battery types from workplace devices and equipment

Guidance on safe consolidation practices to help clients reduce handling hazards and improve internal collection workflows

Sustainability-forward recycling outcomes that help keep batteries out of trash streams and support waste diversion goals

Meeting the Growing Battery Waste Stream

From IT refresh cycles and facility upgrades to routine replacements, organizations are generating more battery waste than ever. EACR Inc – Melville helps companies create repeatable recycling processes that support ESG initiatives and operational safety—while keeping teams focused on their core work.
