

Tempo Labs Inc. Named to Guidewire Insurtech Vanguard Program

Tempo Labs Inc., has joined the Guidewire Insurtech Vanguard program, an initiative led by property and casualty cloud platform provider, Guidewire(NYSE: GWRE)

Tempo

TORONTO, ONTARIO, CANADA, January

7, 2026 /EINPresswire.com/ -- [Tempo Labs Inc.](#), the AI-powered platform through which designers and developers collaborate directly on code, announced that the company has joined the [Guidewire Insurtech Vanguard program](#), an initiative led by property and casualty (P&C) cloud platform provider, [Guidewire](#) (NYSE: GWRE), to help insurers learn about the newest insurtechs and how to best leverage them.

“

Insurers can design and build in an AI-first environment that feels like a modern design tool, while still generating production ready code that aligns with the Guidewire Jutro Digital Platform”

Kevin Michael, CEO and Co-Founder

“Joining the Insurtech Vanguard program is a big milestone for Tempo and a strong signal that the industry is ready for a new way to build software,” said Kevin Michael, Tempo co-founder and CEO. “Guidewire customers, and the P&C industry as a whole, are under constant pressure to modernize quickly. However, they are often held back by slow design to development cycles, complex front-end work, and the risk of drifting away from the brand that underpins their applications.”

Michael continued, “With Tempo, insurers can design and

build in an AI-first environment that feels like a modern design tool, while still generating production ready code that aligns with the Guidewire Jutro Digital Platform. That means faster adoption of new digital experiences, shorter deployment timelines, and more consistency across every customer touchpoint.”

Insurtech Vanguard is a community of select startups and technology providers that are bringing novel solutions to the P&C industry. As part of the program, Guidewire provides strategic guidance to and advocates for the participating Insurtech’s, while connecting them with the Guidewire P&C customer community.

“Tempo represents exactly the kind of innovation we look for in our Insurtech Vanguard program,” said Laura Drabik, Guidewire Chief Evangelist. “Our customers want to deliver modern digital experiences faster, without sacrificing the consistency and quality provided by Jutro. Tempo’s AI driven approach to designing and building on top of Jutro helps insurers accelerate software adoption and deployment, while staying aligned with the design principles that underpin their Guidewire applications. By welcoming Tempo into the program, we are expanding the tools available to carriers who are ready to modernize at scale and raise the bar for customer and agent experiences across the industry.”

Tempo brings design and development into a single AI-powered workspace for insurance teams, combining the ease of a design tool with the control of a code editor so designers, product managers, and developers can build production-ready digital experiences together. By eliminating the traditional design handoff, Tempo enables insurance teams to generate reusable frontend code that aligns with Guidewire Jutro Digital Platform and accelerates time to market by an average of 40%.

About Tempo Labs Inc.

Tempo is an AI design tool for React which gives founders, product managers and designers the ability to collaborate visually on code. Unlike other vibe-coding tools, Tempo integrates with production codebases and offers designers the ability to control every pixel by hand just like a traditional design tool. Tempo is building the future of design and design engineering.
