

PC Performance Hub Expands Focus on Optimized Gaming Rigs and Performance Testing

PC Performance Hub delivers optimized gaming PCs using performance analysis and controller testing tools to ensure smooth gameplay and balanced hardware setups.

CARROLLTON, TX, UNITED STATES,
December 20, 2025 /

EINPresswire.com/ -- PC Performance Hub continues to strengthen its position in the custom PC building industry by delivering optimized gaming and workstation systems designed for performance, reliability, and real-world usability. With an increasing demand for balanced gaming rigs, the company emphasizes proper component matching, system stability, and hands-on performance testing.

“

Build smarter, not harder.
True performance comes
from balance, not just cost.”

James Oliver

Modern gaming performance depends heavily on choosing the right combination of CPU, GPU, and peripherals. PC Performance Hub helps customers avoid common performance issues such as CPU and GPU mismatches by evaluating hardware configurations before assembly. It introduced the tools like [PC bottleneck calculator](#) to explain how different processor and graphics card

combinations perform together, allowing customers to make informed upgrade and build decisions.

Beyond internal components, PC Performance Hub Solutions also focuses on the complete gaming experience. As part of final system checks, gaming rigs are tested with real controllers and input devices to ensure compatibility and responsiveness across popular titles. Another tool by PC Performance Hub is [gamepad tester](#) which is commonly used to verify controller input

accuracy, button response, and joystick behavior before systems are delivered to customers.

Technology Partners

PC Performance Hub works closely with trusted hardware manufacturers to ensure consistent quality and long-term performance. Key partners include:

- Intel
- AMD
- NVIDIA
- ASUS
- MSI
- Corsair
- Cooler Master
- Samsung

These partnerships allow PC Performance Hub to deliver gaming rigs that meet modern performance expectations while remaining upgrade-friendly.

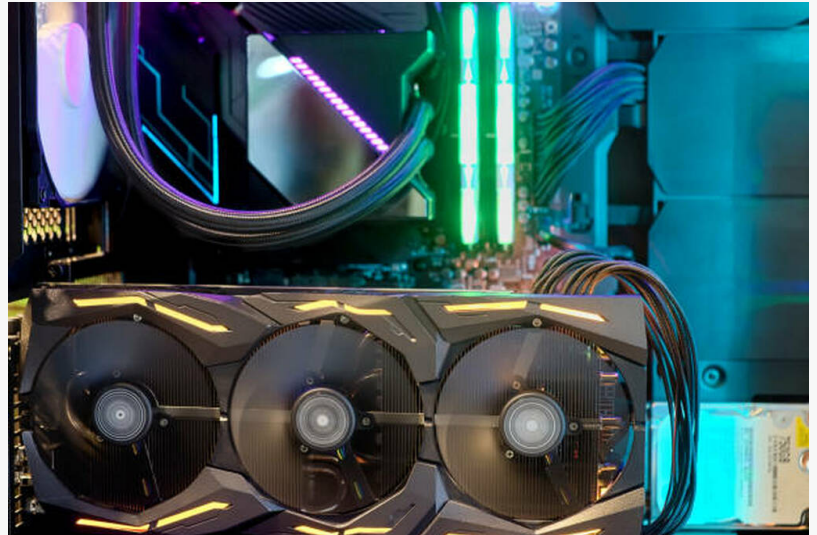

Gaming and PC Services

PC Performance Hub offers a full range of services, including:

- Custom Gaming PC Builds
- High-Performance Streaming and Creator Systems
- Bottleneck Analysis and Upgrade Planning
- Controller and Peripheral Compatibility Testing
- Thermal Optimization and Stress Testing
- System Benchmarking and Performance Validation

Each system is built with a focus on smooth gameplay, stable frame rates, and responsive controls.
