---

## Overview

This 16-night program begins in Oslo and continues to Longyearbyen, where guests embark the Atlas Ocean Voyages World Voyager for an in-depth Arctic expedition through Svalbard, East Greenland, and the Arctic Circle, before disembarking in Reykjavik. The journey concludes with a

2026 Total Solar Eclipse & Epic Arctic Explorer (16-Night Journey) Bookings Available through December 31, 2025

small-group land program in South Iceland, culminating in a carefully planned viewing of the total solar eclipse on August 12, 2026, from Iceland's western peninsula—an exceptionally rare opportunity from this region.

---

### Expedition Cruise Package

The expedition cruise is conducted aboard *World Voyager*, a luxury expedition yacht purpose-built for polar navigation and limited to fewer than 200 guests. Sailing from Longyearbyen, the voyage explores the Svalbard archipelago, where glaciers, fjords, and Arctic wildlife—including polar bears, walrus, seals, and seabird colonies—are commonly encountered. Daily Zodiac landings, guided hikes, and wildlife safaris are led by a professional expedition team, with activities adapted to conditions and wildlife activity.

Continuing south, the ship enters East Greenland's Scoresby Sound, the world's largest fjord system. Guests experience towering icebergs, remote Inuit communities, and quiet tundra landscapes rarely visited by travelers. Several days at sea allow time for onboard enrichment programs focused on Arctic ecology, exploration history, and astronomy, as well as informal interaction with the expedition team. A ceremonial crossing of the Arctic Circle marks a key milestone before the ship reaches Iceland.

---

### Iceland Land Package

Following disembarkation in Reykjavik on August 8, guests begin a five-night land program curated by Midgard Adventure and based at deluxe hotels in Hvalsöllur and Reykjavik. The itinerary highlights Iceland's geological and cultural diversity, including a guided Golden Circle tour, a Super Jeep Adventure Tour into the highlands, and an ATV experience on a black-sand beach designed to be accessible for all activity levels. Select meals are included, emphasizing local ingredients and regional traditions.

Throughout the land program, Midgard's Icelandic guides provide context on volcanic landscapes, folklore, and modern Icelandic life. The small-group format allows flexibility in routing and pacing, creating a balanced experience that complements the preceding expedition cruise.

---

### Total Solar Eclipse — August 12, 2026

The journey culminates on August 12, 2026, with a full-day excursion to Iceland's western peninsula, selected for its optimal position within the path of totality. Supported by local logistics and expert planning, guests will observe the eclipse from a carefully chosen viewing site. The experience includes expert commentary, eclipse viewing support, and a celebratory champagne toast following totality.

The eclipse is expected to reach totality for just over two minutes, offering a rare view of the sun's corona in a setting defined by open skies and minimal light pollution—an extraordinary conclusion to the expedition.
