

OUTLAW GPS Officially Launches as a New Trailer Theft Protection Company

Newly launched company introduces its website, GPS device for trailer tracking, and tracking platform to help with trailer theft protection

LOS ANGELES, CA, UNITED STATES, December 24, 2025 /

EINPresswire.com/ -- OUTLAW GPS, a newly launched U.S. based trailer security company, today announced the launch of its website, alongside the release of its GPS trailer tracking system built specifically for utility trailers, enclosed trailers, and fleet assets.

Trailer theft continues to rise across the United States. The National Insurance Crime Bureau (NICB) reports over 30,000 trailer thefts annually.

According to a recent freight theft report were reported across the U.S. and Canada in 2024, marking a 27% year-over-year increase. Total losses exceeded \$455 million, with the average theft valued at approximately \$202,000.

OUTLAW GPS was created to close that exact gap.

"Trailers are often the most overlooked assets when it comes to theft prevention," said an OUTLAW GPS spokesperson.

"They don't have engines, VIN tracking like vehicles, or factory-installed security systems. OUTLAW GPS gives owners real-time visibility and early alerts the moment a trailer moves when it shouldn't."

[Trailer Theft Protection](#) Built for Real-World Use:

OUTLAW GPS Trailer Tracker is built specifically for trailer theft scenarios, delivering continuous tracking and instant alerts to help owners act before assets are moved or resold.

GPS tracking significantly enhances the recovery of stolen assets. According to PR Newswire, specialist GPS tracking technology has demonstrated recovery success rates of around 85% or higher, compared to just 10-20% for untracked assets.

OUTLAW GPS helps close that response window by delivering:

- Real-time trailer location tracking
- Instant alerts for unauthorized movement or towing
- Location history and activity records

The platform is designed for individual trailer owners, contractors, rental operations, and fleet managers who need simple, reliable tracking without complex installations.

Designed for Fast Setup and Reliable Tracking:

OUTLAW GPS Trailer Tracker is engineered for quick deployment and dependable performance in outdoor environments where trailers are commonly stored.

Key features include:

- Compact, low-profile design for discreet placement

- Rugged, weather-resistant housing

- Long-term power options for unattended trailers

- Accurate location reporting with frequent updates

- Coverage designed for both local and long-distance movement

- Setup requires no specialized tools or technicians, making it easy for owners to install and activate tracking in minutes.

Availability

The OUTLAW GPS Trailer Tracker is available now through the newly launched website at:
