USEReady Advances Agentic Automation and Enterprise Modernization Vision with New Digital Experience

Brings together modernization engineering, data-for-AI readiness, and agentic automation to help organizations achieve intelligent and autonomous operations

NEW YORK, NY, UNITED STATES, December 24, 2025 / EINPresswire.com/ -- USEReady, a leading provider of data analytics modernization and agentic AI automation solutions, today unveiled its redesigned website, marking a major milestone in the company's evolution toward empowering enterprises in the agentic world. The new digital experience reflects USEReady's strategic pivot to AI-powered decision intelligence and agentic process automation, presenting a unified view of the company's solution ecosystem and enterprise modernization capabilities.

WE EMPOWER PEOPLE
TO SUCCEED WITH DATA

USEReady Introduces New Digital Experience for the Agentic Enterprise

The redesigned website serves as a centralized destination for USEReady's expanded offerings. Anchored in the company's messaging pillar – Empowering Enterprises for the Agentic World – the site highlights USEReady's mission to enable data-rich, AI-powered decision-making for autonomous enterprises.

At the center of the experience is the USEReady Brain – the architectural model behind the company's offerings that enables efficient data management and intelligence flows across an enterprise. The site uses this narrative to visually and conceptually connect USEReady's solutions: modernization and transformation systems on the left side, and AI-powered cognitive

capabilities on the right. Together, they illustrate how enterprises evolve from static, reporting-centric environments into dynamic agentic organizations where data, intelligence, and action operate in a continuous loop.

The left side of the Brain offerings enable the data-analytical modernization foundation enterprises need to move forward – [MigrationWorks](#), a software-powered consulting service to accelerate legacy migration supported by platforms/accelerators (STORM, MigratorIQ, Pixel Perfect Reporting), and implementation of leading cloud and AI-ready platforms. These services prepare organizations for cloud scale, eliminate technical debt, and create clean, governed, AI-ready data ecosystems.

Uday Hegde, Co-founder & CEO, USEReady

The right-side Brain offerings enable enterprise cognitive and agentic capabilities that activate enterprise intelligence and agentic automation-powered autonomous operations. These include pre-built agents such as adaptive search systems, intelligent document processing, and agentic workflow orchestration and automation under the [AlphaGenie](#) brand offering.

> "
> This redesign reflects who we are today and, more importantly, the company we are becoming."
>
> *Uday Hegde, Co-founder & CEO, USEReady*

"This redesign reflects who we are today and, more importantly, the company we are becoming," said Uday Hegde, Co-founder & CEO of USEReady. "Enterprise leaders are no longer asking whether they should adopt AI. They're asking how quickly they can apply and scale enterprise-wide AI responsibly, for competitive advantage. Our new website is built around the idea that organizations need a partner who can help them modernize, become data-rich, and activate agentic operations responsibly. It brings clarity to our approach, our methodology, and the outcomes we deliver."

With the new site, USEReady provides a simplified, integrated view of its complete portfolio. Visitors can explore how the company supports transformation journeys end-to-end — from retiring legacy systems through MigrationWorks to enabling autonomous workflows through AlphaGenie. Every solution page emphasizes measurable outcomes, responsible and platform powered accelerated deployment, and USEReady's ART (Accuracy, Responsibility,

Trustworthiness) framework that ensures enterprise-grade reliability.

One section of the site offers a snapshot of USEReady's cross-industry AI and modernization capabilities, enabling enterprises to explore solutions across customer service, supply chain, finance, compliance, product discovery, and IT modernization. Each area is supported by use cases, customer outcomes, and implementation models including micro-POCs and value validation frameworks that have become a hallmark of USEReady engagements.

Key capabilities highlighted on the new website include:
• Modernization offerings under the MigrationWorks brand for legacy BI retirement with platforms/accelerators such as STORM for Tableau Cloud migration, MigratorIQ for automation enabled legacy data-analytics systems migration, and Pixel Perfect Reporting for high-fidelity, compliance-focused reporting.
• AI and agentic automation offerings under the AlphaGenie brand spanning generative AI solutions, cross-functional, pre-built agents such as document intelligence, semantic and enterprise search, industry/domain-centric agents and process automation solutions delivered natively inside governed data ecosystems leveraging our ART (Accuracy, Responsibility, Trustworthiness) framework.
• Enterprise-scale cloud data engineering and modernization capabilities across Snowflake, Databricks, AWS, Azure, and Salesforce that establish the AI-ready foundations required for autonomous operations and decision-making.

"The new digital experience aligns our narrative with the work we are doing every day for our customers," said Lalit Bakshi, Co-founder & President of USEReady. "Our clients want to modernize faster, leverage AI responsibly, and operationalize automation that can think, reason, and adapt. What this new platform does well is show how all our capabilities connect — how modernization on one side and agentic automation and intelligence on the other come together to create resilient, AI-ready, and ultimately autonomous enterprises. It reflects our focus not just on technology, but on delivering business outcomes with speed and confidence."

The redesign also introduces an expanded resource center featuring enterprise playbooks, industry insights, modernization frameworks, and customer success stories that demonstrate USEReady's track record across financial services, manufacturing, healthcare, retail, energy, and public sector. New navigation elements make it easier for CIOs, CDAOs, and Digital & AI transformation leaders to explore relevant solutions and understand how USEReady's methodology and platforms translate into enterprise impact.

The launch of the new website represents a broader investment in USEReady's brand, positioning, and customer engagement strategy as the company continues to drive global momentum in agentic AI and enterprise modernization.

About USEReady
Founded in 2011 in New York, USEReady empowers enterprises with cutting-edge AI and Data

Analytics solutions to drive intelligent, autonomous transformation. As a trusted partner to Fortune 500 organizations, USEReady delivers scalable, high-impact solutions through its expertise in Agentic AI, Decision Intelligence, Cloud Data Engineering, and Analytics Modernization. Leveraging proprietary frameworks, platforms and accelerators, along with industry protocols, USEReady enables customers across Manufacturing, Financial Services, Healthcare, Retail, Energy, Travel & Hospitality and Public Sector to achieve measurable outcomes in an agentic world.
