is crucial for stakeholders seeking to capture growth opportunities and establish strategic alliances in this rapidly evolving market.

Which Market Player Is Leading the Generative Artificial Intelligence (AI) In Human Resources (HR) Market? According to our research, Workday Inc. led global sales in 2023 with a 4% market share. The Subscription Services division of the company is partially involved in the generative artificial intelligence (AI) in human resources (HR) market, provides cloud-based software solutions for

financial management, human capital management (HCM), planning, and analytics, delivered to customers on a subscription basis.

How Concentrated Is the Generative Artificial Intelligence (AI) In Human Resources (HR) Market? The market is fragmented, with the top 10 players accounting for 23% of total market revenue in 2023. This level of fragmentation reflects the industry's diverse solution landscape, driven by varied HR use cases, differing levels of AI maturity among enterprises, and the rapid pace of innovation attracting numerous niche and emerging vendors. While leading providers such as Workday, Oracle, SAP, IBM, ADP, Dayforce, Cegid, Microsoft, and iCIMS collectively shape the competitive landscape with established client bases and integrated AI-enabled HR platforms, smaller firms continue to address specialized requirements across talent acquisition, employee experience, and workforce analytics. As organizations accelerate adoption of generative AI for recruitment, productivity enhancement, and decision support, the market is expected to see increased consolidation, strategic partnerships, and deeper integration of AI capabilities—further strengthening the position of major players.

- Leading companies include:

- o Workday Inc. (4%)
- o Oracle Corporation (4%)
- o SAP SE (3%)
- o IBM Corporation (3%)
- o Phenom People Inc. (2%)
- o Automatic Data Processing Inc. (ADP) (2%)
- o Ceridian HCM Holding Inc. (Dayforce Inc.) (2%)
- o Cegid Group (1%)
