

Astra and Sprinto Partner to Deliver Faster, Verified, Audit-Ready Compliance

Astra and Sprinto join forces to connect verified pentesting with compliance automation, giving companies a faster, more credible path to security assurance.

CLAYMONT, DE, UNITED STATES, January 9, 2026 /EINPresswire.com/ -- [Astra Security](#), a leading provider of AI-powered offensive Vulnerability Assessment and Penetration Testing (VAPT) solutions, today announced a strategic partnership with [Sprinto](#), an AI-native global compliance

automation platform. The partnership brings together Astra's continuous security validation and Sprinto's automated audit workflows, enabling businesses to move from pentest to proof of compliance effortlessly.

For fast-scaling teams, managing security testing and compliance separately often leads to duplicate efforts, vendor fatigue, and long audit cycles. This collaboration eliminates those silos by offering a connected workflow where validated vulnerabilities, fixes, and evidence flow directly into compliance reporting.

"Security testing and compliance were never meant to be siloed. The traditional vendor hunt creates frustrating delays. Our partnership with Sprinto ends that," said Shikhil Sharma, Co-founder and CEO of Astra Security.

"Too often, CISOs are viewed as growth blockers. At Sprinto, we help security leaders become growth enablers who unlock new markets. Our partnership with Astra is a step in that direction. The unified automated compliance and independent security testing ecosystem enables compliance owners to move faster, pass audits with confidence, and build lasting credibility," added Girish Redekar, CEO & Co-founder of Sprinto.

The joint solution offers multiple advantages for teams aiming to achieve and maintain security compliance at scale:

Astra - Sprinto Partnership

- Unified workflow: Integrates Astra's pentesting insights with Sprinto's compliance automation for a seamless, end-to-end process.
- Credible assurance: Every finding validated by Astra's security experts becomes verifiable evidence that auditors can trust.
- Accelerated compliance: Organizations can move from pentest to audit-ready state in days, reducing time, cost, and coordination.

About Astra Security

Astra Security provides an advanced VAPT platform that blends AI automation with expert-led manual testing to deliver accurate, actionable, and audit-ready security insights. With 1,000+ customers across 73+ countries that include Ford, Loom, CompTIA, Hitachi, HackerRank, OLX, and Prime Healthcare, Astra helps teams continuously validate security posture, accelerate remediation, and prove compliance with confidence.
