

Yiruixing Packaging Expands OEM & ODM Capabilities for Large-Scale Protein and Supplement Producers and Bulk Buyers

Yiruixing Packaging is a manufacturer of custom packaging solutions, mainly focused on OEM and ODM services for worldwide customers.

FO SHAN SHI, GUANG DONG SHENG, CHINA, January 2, 2026
/EINPresswire.com/ -- Yiruixing Packaging Expands OEM & ODM Capabilities to Support Large-Scale Protein and Supplement Producers and Bulk Buyers

Yiruixing Packaging has expanded its OEM and ODM capabilities to better serve manufacturers and bulk buyers in the protein, supplement, and nutrition sectors. The company cited this move as a response to the increasing demand for scalable, customized packaging solutions that can meet high-volume production and market standard requirements. The expansion of the company's packaging capabilities is a significant step towards Yiruixing Packaging's vision of being a one-stop packaging partner. The company has the facilities and expertise to take on projects of any scale and type, from physical design and paper mill to mass production. Their capabilities are intended to provide capacity to producers who are managing bulk distribution, private-label production, and export-focused packaging for protein powders, dietary supplements, and other nutritional products.

Responding to High-Volume Packaging Requirements

Protein and supplement producers are confronted with rising demands to produce packaging that is consistent, durable, and compliant while at the same time ensuring that production timelines are efficient. Bulk buyers, especially, look for packaging partners who are capable of executing quality control on a large scale without compromising the need for customization. Yiruixing Packaging's expanded OEM and ODM services offer flexible packaging solutions for an extensive range of materials. These include rigid boxes, flexible pouches, resealable bags, and

even customized containers. In every case, the company takes into account the protection of the product, its shelf stability, the accuracy of the labeling, and the efficiency of the transport in developing the packaging solution.

Enhanced Custom Packaging Development

As part of its expansion, the company has ramped up expenditure on packaging engineering and design support. The company provides a selection of custom package design options catered to individual product types, how they are filled, what storage conditions are used, and what their final destination is. There are four main areas that these customized packages will focus on:

Custom structural design of the package to specifically fit protein & supplement products

The choice of material for bulk packages, as well as long-term storage

The ability to produce large amounts of the same product in high volume and consistent output

The choices available for branding and printing package designs comply with the regulatory requirements for labelling.

The ultimate goal of this process is to speed up the development cycle and create packaging that is easy to incorporate into established manufacturing processes.

Scalable Manufacturing for Bulk and OEM Orders

Commercial manufacturers can take advantage of the scalability of new manufacturing capabilities to meet bulk orders from both wholesale and custom sizes. The expansion has allowed YiruiXing Packaging to manufacture both standardized OEM packages and completely customized ODM packages. The ability to scale up allows producers and buyers to make large quantity purchases and maintain consistent specifications across each production run. The increased production capacity of YiruiXing Packaging has also created an opportunity for contract manufacturers, supplement brands, and distributors to provide their customers with a reliable source of supply continuity, particularly when serving multiple markets or experiencing seasonal demand fluctuations.

Emphasis on Quality Control and Compliance

Quality management continues to be at the heart of the expanded OEM and ODM operations. The company expanded its inspection and quality control checks that cover the materials, printing, and the final packaging output in order to maintain the consistency and performance of the product.

The packaging solutions are created in compliance with global packaging standards; thus, protein supplements and other nutrition compliance expectations are met across different markets, and product integrity is maintained throughout the supply chain.

About YiruiXing Packaging

YiruiXing Packaging is a provider of custom packaging manufacturing services, mainly focused on

OEM and ODM solutions for global customers. Its product range covers rigid packaging, flexible packaging, and customized solutions that are designed to support high-volume production and bulk distribution requirements across various industries, including nutrition and supplements.
