

Renogy Named Top Off-Grid Power Solution 2025 by Energy Tech Review

The award recognizes Renogy's integrated, system-level approach to delivering reliable off-grid energy solutions worldwide.

ONTARIO, CA, UNITED STATES, January 5, 2026 /EINPresswire.com/ -- [Renogy](#), a global leader in off-grid energy solutions, has been named Top [Off-Grid Power Solution](#) 2025 by Energy Tech Review, a respected authority in the energy technology sector. The recognition underscores Renogy's continued commitment to making energy independence simple, reliable, and accessible through innovative, system-level power solutions.

Once considered a niche for campers and remote communities, off-grid energy is rapidly becoming a mainstream lifestyle choice. As more people live, work, and travel beyond the limits of traditional infrastructure, demand is growing for flexible and dependable power systems that can adapt to real-world conditions. Renogy is responding to this shift by developing fully integrated off-grid energy solutions designed to support mobile living, remote work, outdoor exploration, and independent power generation across diverse environments.

“

Energy is the foundation of freedom, and we will continue expanding access to reliable off-grid power so more communities can live and build on their own terms.”

*Dr. Yi Li, the founder and CEO
of Renogy*

Founded and headquartered in the United States, Renogy sells in over 50 countries worldwide and operates 15 global

R&D, manufacturing, and customer support sites across 11 countries. The company employs more than 800 people globally, over 40 percent of whom focus on R&D and product innovation, and holds more than 200 core patents across solar, energy storage, power electronics, and

energy IoT technologies.

Renogy's ISO-certified manufacturing facility spans 55,000 square meters and is supported by over USD 150 million in investment, positioning manufacturing as a strategic foundation for quality control, innovation delivery, and scalable growth.

By aligning manufacturing capabilities closely with R&D and product engineering, Renogy ensures that advanced energy technologies are brought to market with consistency, reliability, and speed. Working alongside OEMs, installers, and global distribution partners, including manufacturers across the [Recreational Vehicles](#), marine, and special vehicle segments, as well as leading retail and dealer networks, Renogy delivers trusted off-grid power solutions for consumer and commercial markets worldwide.

While many companies in the off-grid space focus on individual components, Renogy differentiates itself through a holistic, system-driven approach. By offering fully integrated power systems supported by smart energy management and localized customer support, Renogy prioritizes usability, long-term reliability, and trust. This approach enables users and partners across the United States, Europe, Australia, Japan, and emerging markets to adopt off-grid energy with confidence.

“Off-grid power is not just about disconnecting from the grid—it’s about redefining how people live, move, and thrive in a world that is no longer bound by fixed infrastructure,” said Dr. Yi Li, Founder and CEO of Renogy. “Energy is the foundation of freedom, and we will continue expanding access to reliable off-grid power so more communities can live and build on their own terms.”

The Top Off-Grid Power Solution 2025 award from Energy Tech Review serves as external validation of Renogy's leadership and long-term vision. It reinforces the company's belief that when energy becomes simpler, smarter, and more reliable, people gain the freedom to explore new ways of living, working, and moving—without compromise. As Renogy continues to expand its global footprint and enhance its integrated energy offerings, its role as a trusted authority in off-grid power is set to grow even stronger.

About Energy Tech Review

Energy Tech Review is a trusted voice at the forefront of the global energy sector, highlighting technology solutions, services, business strategies, and leadership that shape the future of energy. With a strong presence at global conferences and key industry events, Energy Tech

Review facilitates critical connections and conversations that drive innovation across the energy ecosystem.

About Renogy

Founded in 2010 and headquartered in the United States, Renogy is a global leader in off-grid and mobile energy solutions, empowering millions of people worldwide to live independently and sustainably. From high-efficiency solar panels and lithium batteries to smart energy management systems, Renogy products power RVs, boats, marine vessels, homes, and mobile lifestyles around the world. Customers can access Renogy products and services through the official website, authorized dealer partners, or pre-installed solutions across a wide range of RVs and boats—making clean, reliable energy easy and convenient to use.
