IoT83 at AIoT World Expo 2026 Reveals What Industrial Enterprises Have Been Missing

Enterprise-grade AIoT platform provider showcases IoT digital transformation for Industrial OEMs at both scale and speed. Booth #761, February 10-12, 2026.

MILPITAS, CA, UNITED STATES, January 6, 2026 /EINPresswire.com/ -- IoT83, the enterprise-grade AIoT platform provider for industrial OEMs, announced today that it will be showcasing its transformative connected equipment solutions at AIoT World Expo, held February 10-12, 2026, at the newly expanded Broward County Convention Center in Fort Lauderdale, Florida.

As a Gold Sponsor, IoT83 will be featured in booth #761, where attendees can discover how the platform accelerates the transformation of connected equipment into intelligent, high-value digital services.

> At AIoT World Expo, we're excited to demonstrate how our platform, Flex83, eliminates the complexity, accelerates the AIoT adoption, and drives measurable ROI for industrial enterprises globally."
>
> *Nishant Puri, Co-Founder at IoT83*

AI and IoT are converging to create intelligent, connected systems that think, learn, and act—driving innovation across every industry. From smart cities and factories to healthcare, energy, and transportation, the fusion of artificial intelligence and the Internet of Things is delivering new levels of automation, efficiency, and insight. Industrial enterprises are discovering that companies leading this transformation aren't just optimizing operations—they're redefining what's possible.

The AIoT World Expo brings together the global community of innovators powering this convergence. Attendees will discover how AI and IoT are working together to create smarter ecosystems, uncover new business opportunities, and shape the future of intelligent connectivity.

How IoT83 is Accelerating Industrial Digital Transformation with AIoT

IoT83 provides the enterprise-grade AIoT platform that empowers industrial OEMs to transform connected equipment into intelligent, high-value digital services. The platform addresses the critical challenges facing industrial enterprises today: fragmented data ecosystems, delayed AI/ML adoption, and extended time-to-market cycles.

With IoT83's cloud-agnostic platform, industrial enterprises can build and own AIoT solutions, unify and govern data from edge to cloud, accelerate AI and machine learning adoption, and manage complete asset lifecycles at scale. The result? A 10x improvement in time-to-market and 3x reduction in total cost of ownership—enabling enterprises to compete in the AI-driven industrial economy.

Opportunities for Engagement at AIoT World Expo

IoT83's participation in AIoT World Expo 2026 extends beyond the exhibition floor. As a Gold Sponsor, IoT83 will:

Present in the AIoT World Expo Theatre, offering thought leadership on the practical applications of AIoT in industrial settings

Participate in the AIoT World Expo Conference Program, engaging with panelists and attendees in critical discussions around intelligent connectivity and digital transformation

Host networking opportunities to connect with industry innovators, OEMs, system integrators, and enterprise decision-makers

Participate in video interviews with IoT thought leaders, exploring the future of intelligent, connected systems

Co-host a pre-event webinar designed to prepare attendees for the transformational insights and networking opportunities at the expo

Join IoT83 at Booth #761 near the IoT Theatre

Attendees are invited to visit IoT83 at booth #761 during exhibit hours (Wednesday, February 11, 12:00 PM–5:00 PM and Thursday, February 12, 10:00 AM–3:00 PM) to explore the Flex83 platform, discuss industry-specific challenges, and discover how enterprises are achieving digital transformation at scale.

Claim your complimentary Expo Plus pass (valued at $200) using IoT83's exclusive event registration link.

About IoT83

IoT83 provides the enterprise-grade AIoT platform for industrial OEMs to transform connected equipment into intelligent, high-value digital services. The platform enables enterprises to build and own AIoT solutions, unify and govern data from edge to cloud, accelerate AI/ML adoption, and manage complete asset lifecycles at scale—delivering 10x TTM speed and 3x savings in TCO.
