

Lithosphere Advances Cross-Chain Infrastructure Ahead of Upcoming Network Milestones

Platform strengthens interoperability and core systems to support scalable ecosystem growth

LONDON, LONDON, UNITED KINGDOM, January 7, 2026

/EINPresswire.com/ -- [Lithosphere](#) (LITHO), an AI-powered blockchain ecosystem focused on interoperability and automation, announced continued progress across its cross-chain infrastructure as it prepares for upcoming network milestones. The latest advancements reinforce Lithosphere's commitment to building a scalable foundation that supports seamless interaction across decentralized networks.

Automated launchpad for onboarding and discovering blockchain projects

Recent infrastructure updates focus on enhancing cross-chain communication, system reliability, and automation layers that enable applications to operate efficiently across multiple blockchains. These improvements are designed to support broader ecosystem participation while ensuring developers can build and deploy without unnecessary complexity. By strengthening core infrastructure ahead of key milestones, Lithosphere aims to maintain network performance as adoption expands.

Lithosphere's cross-chain framework is engineered to simplify multichain development by aligning tools, standards, and intelligence-driven systems under a unified architecture. Builders benefit from improved interoperability and streamlined access to network resources, while users gain a more consistent experience across decentralized applications. This approach supports long-term ecosystem sustainability and developer confidence.

"Cross-chain infrastructure is foundational to the next phase of decentralized innovation," said [J. King Kasr](#), Chief Scientist at Kaj Labs. "By advancing these systems ahead of network milestones, Lithosphere is laying the groundwork for scalable adoption and resilient multichain

interaction.”

As Lithosphere continues to evolve its infrastructure, the platform remains focused on delivering AI-enhanced solutions that enable interoperability, automation, and sustainable growth across decentralized ecosystems.

About Lithosphere

Lithosphere is an AI-driven blockchain platform designed to enable scalable cross-chain applications and decentralized ecosystems. Integrating deep learning technology with decentralized infrastructure, Lithosphere provides automated tools and standards that empower developers, communities, and multichain innovation. The LITHO token supports network operations, governance, and ecosystem participation.
