GT Clocks Joins the Workday Partner Program

COOPER CITY, FL, UNITED STATES, January 7, 2026 /EINPresswire.com/ -- GT Clocks, (trading name of Grosvenor Technology LLC), a global provider of secure time and attendance solutions, today announced it joined the Workday Partner program and has launched [GT Time](#) on the Workday Marketplace. This partnership enables dedicated time collection hardware to integrate with the

Workday platform, to help organizations eliminate time theft and support payroll accuracy from the point of punch. The modern enterprise environment faces significant pressure to support payroll accuracy. Relying on fragmented or insecure time solutions exposes businesses to significant financial risk from errors and time theft. The partnership directly addresses these operational challenges by helping facilitate the data being collected at the physical level to be fully verified, accurate, and fraud-free before it reaches the Workday platform.

The GT Time middleware platform acts as the secure, intelligent bridge. By linking GT Clocks' 30+ years of dedicated hardware expertise directly with [Workday Time Tracking](#), the solution provides customers with auditable data integrity and removes the need for manual reconciliation of time punches.

The integration enables a secure, bi-directional flow of verified workforce data, helping Workday customers to maximize the value of their HCM investment by operating on accurate, audit-ready data.

As a Workday Partner, GT Clocks is better equipped to:

 Provide Verified Data Integrity: We bring over 30 years of dedicated hardware expertise, verifying that the integrity of data received in the Workday platform is auditable, accurate data directly from the point of punch.
 Enable a Streamlined Integration: GT Time facilitates the secure, real-time synchronization required for efficient payroll processing, eliminating reconciliation headaches and manual errors.
 Maximize ROI: We offer Workday customers a resilient, future-proof time collection solution that significantly reduces compliance risk and enhances strategic operational oversight.

"Organizations implementing Workday Time Tracking need absolute confidence in their time

data," said Matthew Smith, VP Global Sales. "Manual tracking methods and mobile apps create vulnerabilities that undermine payroll accuracy and drive up costs. Our partnership with Workday allows us to bring purpose-built hardware verification directly to the ecosystem - eliminating buddy punching at the source and supporting that every data point flowing into Workday is authenticated and audit-ready. We're excited to help Workday customers achieve the data integrity their payroll and compliance processes demand."

Workday [Human Capital Management HCM](#) is a unified system that helps enable organizations to make faster decisions, gain operational visibility, prepare for future talent shifts, and build effective teams.

More information on GT Clocks' solution can be found on the Workday Marketplace, which provides easy access to solutions built by Workday and its partners.
