

SharkTime Software announces wList 3.0; File searching and file listing redefined

wList - enhanced Windows file search and directory listing tool. wList offers faster searches, smart file categorization, and an intuitive UI.

GDYNIA, POMORSKIE, POLAND, January 8, 2026 /EINPresswire.com/ -- SharkTime Software, an independent company focused on practical Windows utility applications, announces the release of wList 3.0, a major new version of its file search and directory listing tool for Windows. Released on January 7, 2026, wList 3.0 is designed to improve how users search, locate, and manage files across local and network drives.

As digital storage continues to grow in size and complexity, wList 3.0 provides a fast and straightforward file search experience that outperforms the standard Windows search. Using intelligent caching, the application returns results quickly and groups files into clear categories such as Audio, Video, Pictures, Documents, and Archives, allowing users to easily narrow down results and find relevant files.

Key features of wList 3.0 include:

- **High-Performance Search:** Fast file and folder discovery across local and network drives through advanced caching.
- **Clean and Intuitive Interface:** A streamlined user interface designed for ease of use and

efficiency.

- Smart Categorization: Built-in filters that organize results by common file types, including audio, video, pictures, documents, and archives.
- Flexible File Listing: Creation and export of detailed file lists using three different listing formats.
- Direct File Access: Ability to open files or their containing folders directly from the results list.
- Unicode Support: Support for national and international characters.
- Internal Image Preview: Built-in image preview for quick viewing without leaving the application.
