

Umeox Shines at CES 2026: Innovative AI Product Line and Platform Capabilities Receive Widespread Praise

LAS VEGAS, NV, UNITED STATES, January 9, 2026 /EINPresswire.com/ -- The 2026 International Consumer Electronics Show (CES 2026) officially opened, and the innovative company UMEOX, with long-term expertise in smart hardware and platform-level technology, once again took center stage. At this exhibition, UMEOX not only showcased its latest technological achievements but also systematically demonstrated its product methodology and underlying capabilities in the AI era, gaining widespread attention and acclaim.

AI Product Innovation: In-Depth Understanding of Product Forms, Core Technologies, and Real-Life Scenarios
At this exhibition, the most notable highlights from UMEOX were its AI product line, representing the company's latest innovations, including the AI Badge, AI Ring, and AI Hajj Band, which received widespread popularity.

AI Badge: The "Invisible Assistant" for Enterprise Efficiency
Addressing pain points in enterprise digital transformation, UMEOX launched the world's first low-power multimodal AI badge. This product,

Umeox- a platform partner that empowers innovators.

Umeox AI product line

with low-power, multimodal sensing combined with local and cloud-based AI analysis, helps enterprises achieve work efficiency analysis, communication optimization, and organizational insights:

- Transparent Sales Processes: Strengthens sales compliance; utilizes group behavior data to assist managers in optimizing processes.
- Quantifiable Sales Behavior: Builds a sales behavior database, automatically generates KPIs, performs behavior analysis, and predicts sales outcomes.
- Sustainable Sales Capability Improvement: AI provides personal sales skill optimization suggestions, reducing training costs.
- Real-Time Customer Management Tracking: Tracks and records the entire sales process and automatically generates meeting notes and reports.

UMEOX CEO stated, "We have initiated pilot collaborations with several companies and received high recognition from both sales teams and individuals. Data shows that it can increase communication efficiency by 50% and boost sales performance by 20%."

AI Ring: A "Seamless Computing" Revolution at Your Fingertips

In the wearable device sector, UMEOX achieved a breakthrough by integrating

AI capabilities into a ring form factor. This device, just 3 millimeters thick, combines health monitoring, behavior recognition, and interactive control:

- Health Perception: Uses a PPG sensor for continuous heart rate and blood oxygen monitoring, with medical-grade accuracy.
- Behavior Analysis: Monitors users' physical activity and provides guidance.
- Emotional Interaction: Infers users' emotional states based on skin conductance and body temperature changes.

Umx AI product line-Customer Reception

Umx AI product line-kid's smart device

UMEOX aims to become an "accelerator" for product developers in the AI era, helping more innovative teams bridge the critical gap from idea to product, from prototype to market. UMEOX is willing to engage in deep exchanges with global AI product developers, partners, and industry leaders to jointly explore the infinite possibilities of the next-generation smart products in the AI era.
