DURHAM, NC, UNITED STATES, January 12, 2026 /EINPresswire.com/ --

Principled Technologies and the BenchmarkXPRT Development Community have released a preview of WebXPRT 5, a free online tool that runs in almost any modern browser and provides objective information about how well a laptop, tablet, phone, or any other web-enabled device handles common web tasks—including browser-based AI-related workloads. Anyone can go to [www.WebXPRT5.com](http://www.WebXPRT5.com) and compare existing performance evaluation results from various devices or run a simple evaluation test on their own.

WebXPRT 5 is the next step in WebXPRT's evolution and represents a major step forward in providing relevant and reliable browser performance data for a wide range of devices."

*Mark L. Van Name, President of Principled Technologies*

The WebXPRT 5 Preview contains seven HTML5-, JavaScript-, and WebAssembly-based scenarios created to mirror the web browser tasks you do every day: Video Background Blur with AI, Detect Faces with AI, Image Classification with AI, Document Scan with AI, Photo Effects, School Science Project, and Homework Spell Check.

"WebXPRT is an industry standard, popular, easy-to-use

benchmark that manufacturers, tech journalists, and consumers worldwide use, with over 1.8 million test runs to date," said Mark L. Van Name, President of Principled Technologies, which administers the BenchmarkXPRT Development Community. "WebXPRT 5 is the next step in WebXPRT's evolution and represents a major step forward in providing relevant and reliable browser performance data for a wide range of devices."

WebXPRT is part of the BenchmarkXPRT suite of performance evaluation tools. The XPRTs help users get the facts before they buy, use, or evaluate tech products such as computers, tablets,

and phones.
