

Sabel Systems Joins Space Force Association as Gold Member to Accelerate Space Domain Innovation

COLORADO SPRINGS, CO, UNITED STATES, January 13, 2026 /EINPresswire.com/ -- The [Space Force Association](#) (SFA) is proud to announce that [Sabel Systems](#) has joined the association as a Gold Corporate Member. This partnership marks a significant collaboration aimed at advancing digital engineering, cybersecurity, and secure mission solutions within the space domain. As the

We look forward to collaborating with SFA and its members to accelerate digital engineering, cybersecurity, and DevSecOps solutions that directly support the U.S. Space Force mission."

*Mike Magnusson, Senior VP
for Space Digital*

United States Space Force continues to modernize its capabilities, the integration of advanced digital ecosystems is vital. Sabel Systems brings a wealth of expertise in bridging the gap between legacy systems and modern, agile technology solutions—expertise that will be instrumental in supporting SFA's mission to achieve superior space power.

"Joining the Space Force Association as a Gold Corporate Member reflects Sabel Systems' commitment to advancing secure, resilient, and mission-ready digital capabilities for the space domain," said Mike Magnusson, Senior Vice President for Space Digital at Sabel Systems. "We look

forward to collaborating with SFA and its members to accelerate digital engineering, cybersecurity, and DevSecOps solutions that directly support the U.S. Space Force mission."

As a Gold Corporate Member, Sabel Systems will actively participate in SFA programming and community engagement.

"We are thrilled to welcome Sabel Systems to our growing community of industry leaders," said Bill Woolf (Col. Ret.), founder and president of the Space Force Association. "Their commitment to innovation and their deep technical roots in supporting the Department of Defense will provide invaluable perspectives as we work together to advocate for a strong and secure U.S. Space Force."

About Sabel Systems

Sabel Systems is a leading provider of digital research and development, acquisition, and

sustainment solutions for the U.S. Department of Defense and commercial clients. Headquartered in Beavercreek, Ohio, the company specializes in digital engineering, cybersecurity, and cloud/IT enablement.

With a "mission-first" approach, Sabel Systems simplifies digital complexity through its innovative Digital Engineering Cloud®, providing secure, scalable environments that connect data and teams in real-time. Recently, Sabel Systems expanded its space-domain capabilities through the acquisition of Centil, further strengthening its expertise in DevSecOps and space-domain systems engineering.

About the Space Force Association

The Space Force Association is the only professional organization solely dedicated to supporting the United States Space Force, United States Space Command, and the space industry. The SFA provides a forum for space professionals and advocates to collaborate, educate, and influence the future of space power.
